

SEYMOUR DAILY REPUBLICAN.

VOLUME XXIX NO. 321

SEYMOUR, INDIANA, SATURDAY, NOVEMBER 26, 1910.

PRICE TWO CENTS

TAFT CONSIDERS INDIANA JUDGE

High Federal Position May Be Tendered Judge O. H. Montgomery of This City.

WASHINGTON SPECIAL TODAY

Says He May Be Made Judge of Court of Commerce.—Mentioned For Supreme Judge.

There is a possibility that Judge Oscar H. Montgomery, of this city, may be honored by President Taft with an important appointment, though he is not a candidate for a position.

A Washington special this morning says: Judge Oscar H. Montgomery, who is closing a period of six years' service on the Indiana Supreme Bench is regarded as a possible prospective member of the new Court of Commerce authorized by Congress last year. His name will be considered by President Taft for a place on the Commerce Court. Some of his friends have been suggesting him for the Supreme Court of the United States, but it is understood the President has his mind pretty well made up as to the vacancies in that tribunal. Judge Montgomery's case goes to the President in the best possible shape. He is recommended as an able jurist, whose knowledge of the law is comprehensive and whose experience entitles him to be considered for higher judicial honors.

Judge Montgomery, who is in the city today, says that he has not been a candidate for a position and did not know the matter had been presented to President Taft, though friends had talked to him of a supreme court position. It is known that recently the other members of the Supreme Court of the State and members of the Appellate Court had of their own accord, written letters pointing out Judge Montgomery's qualifications for a place on the Supreme Court Bench of the United States.

A number of Indiana attorneys some time ago sent in endorsements of Judge Francis Baker for a Supreme Judgeship. There are five judges of of Court of Commerce to be appointed and Judge Montgomery stated that he was not well informed as to the nature and duties of this court. He has not been arranging his affairs with an idea of securing an appointment and has not been working in that direction. "Whatever has been done in that way is the work of friends and attorneys who recognize his ability and qualifications and know the splendid record he has made on the Supreme Bench of the state. There is no question that Judge Montgomery is able to fill with dignity and credit any judicial position to which he might be appointed and while Seymour people would regret to lose him as a citizen of this place they wish him all success.

MORE MEN

Employed by B. & O.—Ten Engineers, and Six Firemen.

The B. & O. employed six more firemen and ten engineers this morning. These men have been in the employ of the Duluth and Iron Range Railway Company, which does most of its business during the summer months, and have accepted employment with the B. & O. until March 1st. Those who were employed this morning are: George Briteson, Eli, Minn.; Otto Rhin, Kilburn, Wis.; Vincent Sankey, Marquette, Mich.; C. P. Logan, Waterloo, N. Y.; James Enfield, Montkato, Minn.; and Marlin Joyce, Tower, Minn. as firemen and Milo Patrick, More Lake, Minn.; Ben Jones, Two Harbors, Mich.; G. Feaster, Two Harbors, Mich.; Stephen Keller, Chicago, Ill.; Gus Janson, Two Harbors, Mich.; Roscoe Asher, Albany, Mo.; G. R. Caffran, North Branch, Mich.; C. W. Mills, Fresno, Cal.; G. W. Brown, Two Harbors, Mich.; and W. B. Wells, Two Harbors, Mich. as engineers. These men have all gone to North Vernon to pass the medical examination as required by the rules of the company.

MEDORA STORE

Robbed of Silks and Other Goods Friday Night.

The Hinderlider general store at Medora was robbed of \$100 worth of silks and other goods Friday night. Entrance was gained through a rear window. The burglary was discovered early this morning and officers of surrounding towns notified. Three Italian peddlers were in the town Friday evening and it is supposed left on a night train. Marshal Abell, of Seymour was notified to watch the trains for them but no suspicious characters were discovered.

F. P. Schmitt Dead.

B. F. Schneck received a message this morning of the death of F. P. Schmitt, of Chicago. Mr. Schmitt had been connected with the Seymour Woolen Mills for over thirty years and was known here. He was in the city last week and only a few days ago returned to his home from a business trip at Louisville. No particulars were given and it is thought his death was sudden. He was seventy-six years of age.

Funeral Today.

The funeral of Miss Elsie Cordes was conducted at the home of her father this afternoon and was largely attended by her many friends. The many floral emblems from her friends out of the city and State Normal, where she attended school, as well as here, showed her popularity here and elsewhere. The funeral services were conducted by Rev. H. R. Boech, of the St. Paul church. Burial at Riverview cemetery.

Why?

Yes, if your face does hurt a little you can laugh just the same. Try it on "Home Made Mince Pies" and "Yankeeana" at the Rustic tonight.

Lame back comes on suddenly and is extremely painful. It is caused by rheumatism of the muscles. Quick relief is afforded by applying Chamberlain's Liniment. Sold by Andrews-Schwenk Drug Co.

Mrs. E. Brown, of Pueblo, Colo., Mrs. Hazel Cobb, of Des Moines, Ia., Mrs. J. L. Bryan, of Missouri, and Miss Ruth Owens, of Franklin, have been guests of Mrs. Samuel Crow.

T. J. Stanfield is at home from a stay of several weeks in the south.

ANOTHER WRECK THIS MORNING

A Headon Collision On the B. & O. S.-W. Occurred Near North Bend.

CULLOMS OPERATOR BLAMED

Much Damage But No One Seriously Hurt.—Seymour Men in Charge of Trains.

The failure of an operator at Culloms to give an order was the cause of another bad collision on the B. & O. S-W. this morning which occurred near North Bend when the fast west-bound train, No. 59, a double header, and freight second No. 50, eastbound, met headon while both trains were running at a high speed. The three engines were badly damaged, and the cars were piled up, but fortunately none of the members of the crews were seriously injured.

Second No. 50 left here at 6 p. m. Friday evening as an extra, and was in charge of conductor W. C. Cox, of Seymour, with Engineer Clifford Starr of this city, in charge of the engine. Joseph Fisher was the fireman. After they left North Vernon, however, the number of the train was changed, and orders were given that they should meet No. 59 at Delphi, the first siding west of Culloms. It is understood that the operator at Culloms received the order that No. 59 was to meet the east bound train at that place, but for some reason failed to stop it when it passed along the station, and the order was not delivered. As they had received no order to take a siding the crew on No. 59 thought they had a clear track and did not know that the second 50 was on the main track until the trains came within a short distance of each other. Engineer Pearl Peas, of this city, was on the first engine on No. 59 and A. L. Spillman, also of Seymour, was in charge of the second. Ralph Boas, of this city, was in charge of the train.

The accident occurred as the trains were coming around a curve and the engineers had no opportunity to avoid the collision. The enginemen jumped when they realized that their trains would meet, and none of them were seriously injured.

When the trains came together both were running at high speed, and because of the great force of the collision, the engines were badly wrecked and the cars were piled many feet high. The track was also torn up for a considerable distance.

The wrecking crews from Cincinnati and Seymour were called out about 8:15 o'clock and it took the workmen the entire day to clear the track so that the regular passenger trains could pass. All the morning trains eastbound were detoured over the Big Four tracks to North Vernon.

The wreck is remarkable in that no one was seriously hurt, although the trains were running rapidly, and there were three engines in the collision.

THE GOLD MINE RECEPTION

Will Be an Important Event. The Officers of the Company.

Preparations are going on for the Gold Mine's twenty-fifth anniversary celebration which is to be held at the store next Tuesday evening from 7 to 10. The store will be closed at noon that day to give opportunity to complete the decorations which will be elaborate and well worth seeing.

About two hundred invitations have been sent out to former employees, whole sale houses and representatives with whom they have been dealing during the past twenty-five years, and to banks and business houses of the city. As it would have been a difficult task to send special invitations to the public, the announcement in the firm's usual space in the Republican extends to the public a most cordial and hearty invitation to visit the store Tuesday evening and see the most gorgeous display ever made in this city and which will be such as would be a credit to a much larger store.

The management prides itself on being able to suspend business and show to their many friends and customers their appreciation of a long and continuous patronage.

The president of the Gold Mine Dry Goods Company, Mr. A. Strauss of Terre Haute, has been in the mercantile business for forty years, is an able financier and a successful executive officer of the different institutions of which he is the leader. Much credit is due him in the guidance to success of these various institutions. Through his untiring efforts there has been established as the motto of these stores, "reliable merchandise, fair treatment and liberal concessions."

Mr. N. Kaufman, vice president and general manager of this company is no stranger to people of this community. He has been an able assistant in this concern for over twenty years and has risen from the foot of the ladder to the position he now holds. He is considered a good judge of merchandise and an efficient manager and is a liberal user of Printer's Ink. He is always in the front for anything for the good of the city and is a strong believer in patronizing home institutions. Establishments of the Gold Mine type could not exist without a liberal support from the public. Such a store is a credit to Seymour and very few towns of double the size can boast of a more modern and up-to-date establishment.

Mr. N. Speier, secretary and treasurer, the junior member of the company, is perhaps not as well known as Mr. Kaufman but his fifteen years training under Mr. Strauss has won him the responsible place he has in the firm. His management of the finances of the concern has been such that the banks, mills and manufacturers are always ready to extend credit. He has the management of the ready-to-wear and corset departments and their growth and modern equipments certainly testify to his ability.

Mr. Strauss is arranging for an elaborate lunch after the Tuesday evening reception for the employees and exemployees of the concern, thus showing his appreciation of their work and efforts.

NOVEMBER TERM CONVENES MONDAY

Several Important Cases Have Been Filed, Although The Docket is Not as Heavy as Last Term.

SEVERAL DIVORCE CASES FILED

Richard Darringer Brings Suit For Damages Against The Indianapolis & Louisville Traction Co.

Although the docket is not as heavy as it was last term, several important cases will be tried at the November term of the Jackson circuit court which will convene Monday. It is expected, however, that several additional cases will be filed before the opening of the term, which is usually done prior to a new term.

Among the new cases which have been filed is one by Richard Darringer, as plaintiff, against the Indianapolis & Louisville Traction Company. The plaintiff alleges in his complaint that on September 1st, 1910, he took passage on one of the defendant's cars at Crothersville for Sellersburg. When he arrived at the latter station he attempted to get off the car, but as he was stepping to the ground, the car gave a sudden lurch and he was thrown to the ground with great force, and as he fell he struck his face against a sharp object, injuring him about the face and head. He asks that he be given \$1,000 for the injuries he received, which he alleges were caused by the carelessness of the company's employees in starting the car before he had alighted from the step.

Upon appeal the petition of Willard Dixon, et al, for a macadamized road in Carr township will come before the court. The case was originally heard in the commissioners' court. The petitioners had filed a petition with the county commissioners at a recent term, signed by fifty freeholders asking for the construction of 9 macadamized roads in Carr township covering the principle streets in the town of Medora. Proper notice was given and a remonstrance, signed by David Fitzgibbons, et al, was filed within the time specified by law against all the proposed roads except No. 1. The county commissioners held a special session on November 9th to hear the case at which time they decided in favor of the remonstrators, upon the ground that the remonstrance contained the names of more freeholders of Carr township than the petition. The petition claimed that a number of those who signed the remonstrance were not legal freeholders, claiming that they had been deeded small tracts of real estate from one-fourth to one acre, only a short time before the remonstrance was circulated in order to make them eligible to sign said remonstrance as freeholders. The commissioners decided that they had no right to inquire into the legality of the deeds any further than see if the records showed a man to be a freeholder, hence an appeal to the circuit court.

There are a number of divorce cases this term which will come before the court.

Mollie Borders asks that a divorce

To Buy Hunting Reserves.

The State Board of Forestry has a new plan to aid in the reforestation of Indiana.

It has been suggested by the board that Gun clubs, or a number of sportsmen, form a company for the purpose of buying large tracts of hilly woodland of southern Indiana, and convert them into forest and hunting reserves.

There are thousands of acres in that part of the State which are too hilly and broken to be profitable for farming. It was ordained by nature to be a forest and the hunters' vacation ground. If you can not go to the wilds of the Adirondacks, you can bring the wilds to you in Indiana. Interest a few of your friends in the plan of buying a 500 acre tract or more, and build a nice club house on it. Maintain the best house you find on the tract for the residence of the custodian who can farm a few of the best fields, guard the reserve and transport you to and from the reserve. All the remaining cleared land and open woods should be reforested. In a few years the tract will be well stocked with game.

Such an enterprise would not merely develop a hunters' paradise, but the timber products would yield a good per cent. on the investment.

Quits Position.

A Washington Indiana special says: John Hoddinott, for twenty-one years connected with the B. & O. S-W. Railroad, the greater part of which time he has been foreman of the roundhouse in this city, has resigned and Master Mechanic Galloway immediately appointed Charles Clark of this city to the vacancy. The resignation of Mr. Hoddinott is a continuation of the housecleaning inaugurated at the local shops several days ago. Because of the continued lateness of trains on the system a movement is on foot to interest the State Railroad Commission in the matter.

Dr. John F. Spaunhurst, Expert Osteopath of Indianapolis, will be at his offices over first National Bank next Monday. Those who labor under the handicap of ill-health will do well to confer with Dr. Spaunhurst. No charge for examination.

CHILD SWAPPING BEING TRIED, AND EUROPE CALLS IT SUCCESS

French-German-English Exchange Finds Plan Beneficial to Youth.

Columbia Professor Advocate of Trial With Peruvians, For Example.

The heathen Chinese knows more than we of rice and mice and psychiatry. The terrible Turk with his populous And happy domestic overplus, Just puts it over the likes of us. What's Greek to us in arts that please Is A B C to the Siamese. And Timbaktu is surely due With a modern reform or maybe two. So let's begin to use our tin To gather all this culture in. Ey swapping off our kith and kin To start them forth in their poor, uncouth In innocent Yankee or Hoosier youth In the search for cosmopolitan truth.

DR. ERNST RICHARD of Columbia university does not claim that the idea of the international home and visit exchange is original with him. Indeed, it was first brought out within the committee on peace propaganda and international relations of the National German-American alliance, and the alliance indorsed it at the 1910 convention. What is more, it has been tried. The French-German-English children exchange has been doing business for years. Also the very peasants in Switzerland swap their children for a year running, the French-Swiss families with the German-Swiss, for every one has to speak both French and German to get on at all in Switzerland, and it is just as repugnant to the feelings of the Swiss to pay for French or German lessons as it would be to us to pay for singing "The Star Spangled Banner."

May Enhance Universal Peace.

Whether the intercourse between English, French and German families that has been established by the interchange of children has begun to bring about that mutual understanding that shall lead to peace on earth Professor Richard did not know, but that it ought to be is very sure.

"It is most important to the cause of universal peace that all nations shall understand each other," he says. "And how can we come to a better understanding of a foreign people and their institutions than by living among them during one or more of the impressionable years of our youth?"

Dr. Richard's plan to make practical the interchange of American youth with the youth of other nations includes first of all a bureau of exchange. The business of this bureau will be to keep on file the addresses of the folk of all nations who shall register themselves as willing to exchange offspring for a season or so and also a full account of their means, social position, suitability, and so forth.

Dr. Richard considers it most necessary that the interchange shall take place between folk of approximately the same walk in life. There is not the slightest reason, he thinks, why the children of workmen and the children of millionaires should not avail themselves of these opportunities, but it is naturally important that they do not get mixed.

War, Not Peace, Possible.

Thus if Silas Perkins' folk took to swapping Si off for young Gaston de Montpeller it might be embarrassing when it came to asking Gaston to split the kindlings. Also the scion of one of our kings of industry might take it hard to be asked to tend store for Hans Schmidt. It might be broadening, perhaps, but it would probably not tend to the advancement of the cause of universal peace.

"Children should be interchanged between families in like circumstances, of like religious faith and of unimpeachable reliability," says Dr. Richard.

Mrs. James P. Cahen, who is president of the City Mothers' club of

New York, does not agree with Dr. Richard.

"Who is going to mother those exchanged children?" she asks. "I do not believe any right feeling parents in America will be found who can bring themselves to send their children off to a foreign country alone. I don't believe Dr. Richard could send his own children off among strangers like that, or perhaps he hasn't any children."

One Mother Objects.

"And, what is more, I believe that an American education is the education for American children. I have brought mine up entirely in this country, where they are to live and work. It is necessary first that they should understand American conditions and American institutions before they travel to observe foreign life."

Dr. Richard explains that he does not advocate the interchange of infants nor of very young children, but of studious and ambitious youths. Seventeen seems to him the ideal age to spend a year or more among foreign folk. Suppose a New York boy showed artistic promise and a Parisian youth a natural bent toward skyscrapers and subways. What could be better and simpler than for the young artist to betake himself to Paris and live with the young engineer's parents, while the incipient engineer became for a time an American?

Consider the science to which forestry is reduced in Germany. A boy with a bent for forestry and an ambition to build up the American science could not do better than to spend six months or a year in Germany.

Exchange Bureau Planned.

There might in time develop an exchange bureau of situations. Young persons who are starting out in some branch of commerce or in agriculture or forestry could be exchanged by their employers for a few months and thus acquire foreign ideas and methods about their work. Commercial bodies of standing, such as the Austrian Export society in Vienna and the Museum of Commerce of Philadelphia, are thinking favorably of indorsing such a scheme.

Dr. Richard has already received four or five applications from Europe for suitable exchanges and a number from the middle west. Certain circles interested in the peace movement have given hopes of financial support, so it is expected that the necessary funds will soon be on hand to begin the preliminaries.

Dr. Richard does not believe in confining the exchange idea to such countries as France and Germany and England. South America is much interested in the idea.

Peru Is Willing.

The Peruvian government is even willing to provide transportation for young Peruvians who may be interchanged into the United States.

"That may be very nice for the Peruvians, but isn't it a little hard on the American youth that changes off?" Dr. Richard was asked.

"One of the best things such a system of exchange would probably teach us," said Dr. Richard, "is that we are not superior to the rest of the world. I have been an American twenty-seven years, and I speak with all loyalty to my adopted country. We are too much given to assume that we are better than our neighbors without questioning in what way. If a few young Americans were to spend six months or a year in Peru they would be able to understand that the cultivated Peruvian has something to teach us."

OASIS OF THE SNOWS FOUND.

Fertile Soil and Genial Climate in Northern Alaska.

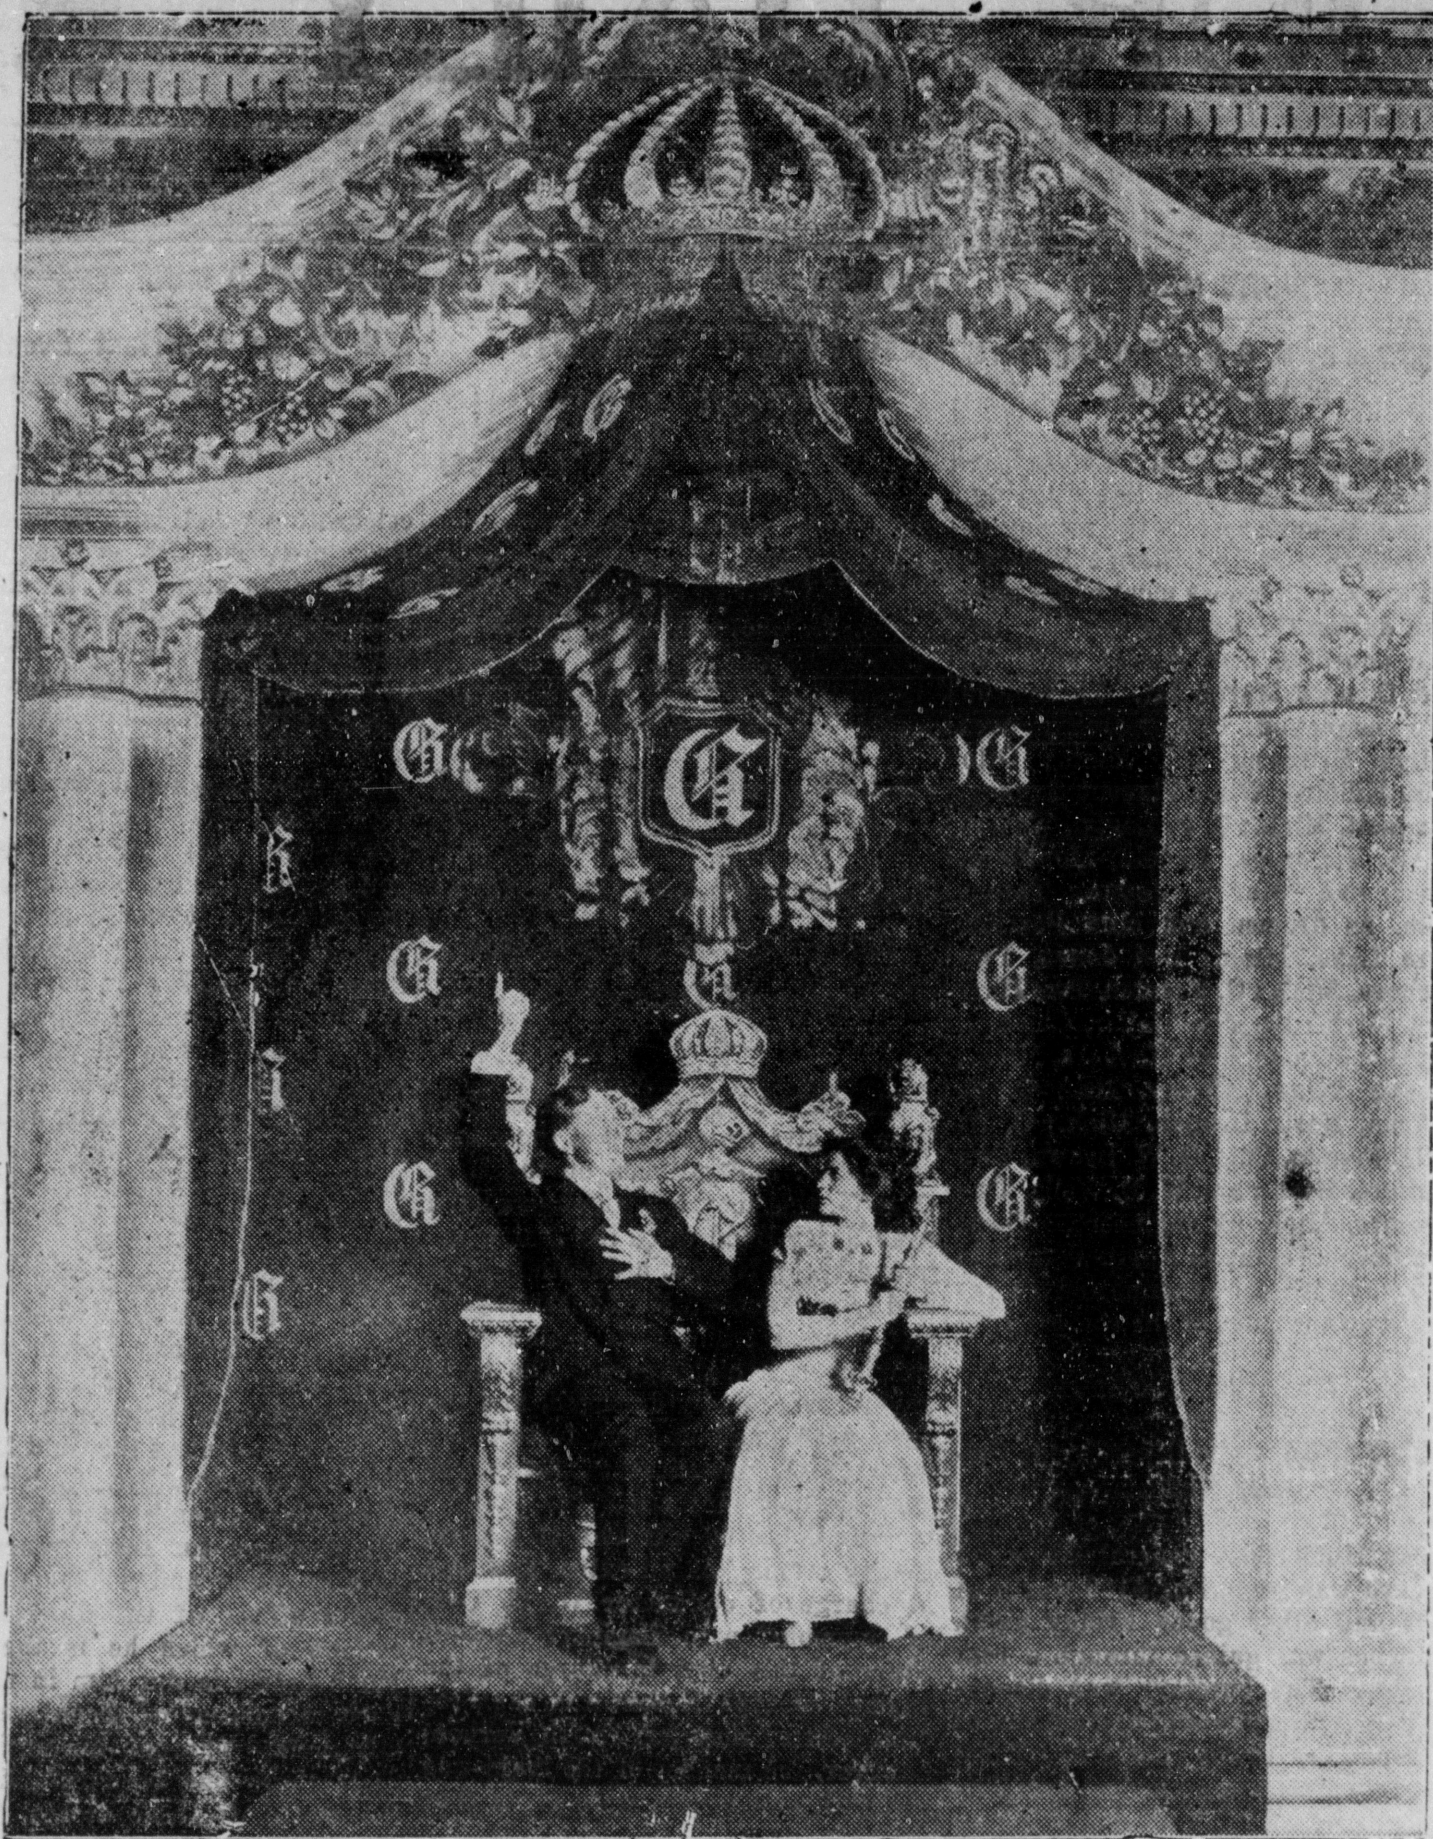

Like an oasis in the desert is a fertile spot discovered in the wilderness of the Koyuk river, Norton sound, northern Alaska, by a number of travelers who say the new field is almost a perfect Utopia and will make fortunes for them.

A dozen or more hot springs revolutionize the appearance of the section. The ground is never covered with snow. Berries and wild fruit grow in profusion. The rivers abound with fish. There is an abundance of caribou and grizzly bear. Ducks, snipe, pheasants and wild geese are plentiful during the summer, being replaced in winter by swarms of ptarmigan.

One of the travelers says he planted vegetables last spring and obtained a crop sufficient to last his comrades through this winter. Near by were creeks from which they made good cleanups of gold with meager facilities.

Convict Has Forgery Preventor.
A machine designed to prevent the alteration of checks or the forging of signatures to negotiable paper has been patented by a convict in a California prison.

Paraguay Exports Native Tea.
The Paraguay tea known as yerba mate now ranks fourth in value among that country's exports.

NEW TYPE OF DREDGER.

Scotch Machine That Digs at Depth of Sixty-five Feet.

There has just been launched on the Clyde a dredger of an entirely new type, built to the order of the British admiralty. This new patent cutter suction hopper dredger has a hopper capacity of 2,000 tons.

This dredger, the St. Lawrence, is the first of its type constructed in the United Kingdom to dredge clay and other solid materials by means of a spiral cutter, a recent development in dredge building. The vessel is fitted with an independent set of triple expansion engines for driving the dredging pump and has a separate engine room immediately in front of the hopper compartment fitted with a complete installation of auxiliary machinery. Three marine type steel boilers supply steam for the propelling and pumping engines and for all other machinery throughout the dredger.

In order to withstand the concussion when dredging in clay mixed with stones the dredging pump is huge and effective. The suction pipe is carried on a girder led through a well forward, and its length enables dredging to be done sixty-five feet below water level. The dredger has also been designed for cutting its own flotation. The cutter at the mouth of the suction pipe is driven through a line of shafting fitted on the upper side of the suction frame and machine cut steel gearing, actuated by a set of powerful, independent, compound condensing engines. In addition to the usual winches for mooring from the deck at bow and stern a special winch is placed amidships from which the moorings are led along the suction frame to fair leads at the lower end. The contents of the hopper can be discharged either through the doors in the ordinary way or overhead by the pump for land reclamation. The construction of the vessel enables it to discharge into barges moored alongside or through a pipe line in addition to loading into its own hopper.—Consular Report.

GILMAN CANCER CURE.

New Treatment of Disease Appears to Be Successful.

The new cancer cure developed by Dr. P. K. Gilman, the chief surgeon at the government hospital at Manila, has apparently proved successful with all patients on whom it has been tried, and experiments are to be made with it at Johns Hopkins hospital. Dr. Gilman has been experimenting for more than nine years with his process. It is briefly as follows: The patient is operated upon, and as much as possible of the infected portion is removed. The wound is thoroughly cleaned, and the substance removed by the operation is put through a special process. It is ground up, heated, various drugs are added, the whole is subjected to a very high pressure, and while in this state the vaccine is extracted. This is in turn injected into the blood vessels of the patient, and in most cases three treatments of the same nature, but administered at intervals of two weeks, are required. In short, the operation consists simply in injecting into the blood of the patient vaccine from the very cancerous growth from which he suffers. Three days are required in most cases for a reaction, and during

this time the temperature of the patient increases until it reaches 104 degrees.

In about three days the action of the serum becomes localized in the vicinity of the cancer and the tissues begin to heal, while a more healthy condition becomes apparent. After a convalescent period of several months the patients whom Dr. Gilman has treated have been pronounced well, and in no instance has there been a recurrence of the trouble. This establishes the fact, therefore, that in the early history of the cases, after the operation has been performed and the injection made, the cure is efficacious.

A Sawdust Filler.

The following preparation will be found useful for filling unsightly cracks and holes in furniture and woodwork: Place a quantity of sawdust in an earthenware vessel and pour boiling water over it. Let it soak for about one week, stirring frequently, then place it over the fire and boil until it is of the consistency of thick paste. Pour it on a coarse cloth and squeeze out the excess moisture. When wanted for use mix a little of it with a thin solution of glue water and fill the cracks or holes with it. When dry and painted over it will have the appearance of ordinary wood.

Novel Household Pump.

A novel pumping system for household service has recently been perfected. It comprises a rotary pump driven by a small electric motor. The pump operates to force water into an air cylinder, the piston of which operates a switch, stopping the motor when the water has reached a certain degree of pressure. When the water is turned on in the faucets the pressure momentarily falls, throwing the switch, which starts the pump going and raises the pressure again to the predetermined point. With this system it is unnecessary to use storage tanks or reservoirs in the house.

To Clean a Shingle Roof.

Sprinkle unslaked lime along the comb of a roof and the rain will dissolve it and carry it over the shingled surface, thus removing moss and accumulations of dirt.

A Mammoth's Meal.

Inside the remains of a mammoth found in Siberia were vegetables hitherto unknown to science, evidently relics of the prehistoric animal's food.

DEFIES THE BLOWPIPE.

New Material For Safes That Proves Invulnerable.

An experiment of interest to safe manufacturers recently took place at Birmingham, England. It was a test of a material designed to make it impossible for the oxyacetylene blowpipe to be successfully used by burglars for opening safes. The new material is of unknown origin and is kept secret by the discoverer.

A safe door section had been built up of two sheets of half inch steel, with a layer of this resisting material between. A drill was first employed, but while it easily bit its way through the outer case of steel it failed to make any impression on the inner filling, and when the drill was withdrawn after five minutes' application all the edge had gone from it. In fact, it had been ground perfectly smooth.

Next the oxyacetylene blowpipe was brought into play, the cone of intense light giving off a heat of 6,300 F. and exerting a pressure of fifty pounds to the inch. Almost directly the steel covering the region of the drill hole became incandescent. Then came a shower of white hot particles, and the metal began to bubble over like a miniature crater, but as soon as the outer steel had been burned away and the inner material had been reached the blowpipe "back fired" and was extinguished.

Time after time it was relighted, but after a second or two's application it was put out of action. The material, in fact, proved absolutely invulnerable, and when the blowpipe was examined the cone was found to have been completely burned away. This was the first time in the discoverer's experience that such a thing had happened, and while affording evidence of the immense heat employed it also provided convincing proof of the resisting power of the new material. Indeed, when later the blowpipe was played on a slab of the material it simply reached a glowing heat, while, strangely enough, it was subdued immediately an extra jet of oxygen was put on. This is quite contrary to usual experience, for the extra oxygen is employed for cutting purposes.

When the blowpipe was withdrawn the sign of its application was a slight unevenness on the surface. A similar application would have been to make a cut of at least a foot in steel three inches thick. Later the jet blew a considerable hole in a fire brick which presented a glossy appearance, and while the discoverer regarded this experiment and also a further one with plumbago as being moderately satisfactory there was no comparison in the resisting power of these mediums with that of the earlier material.

Sharpening Razor Blades.

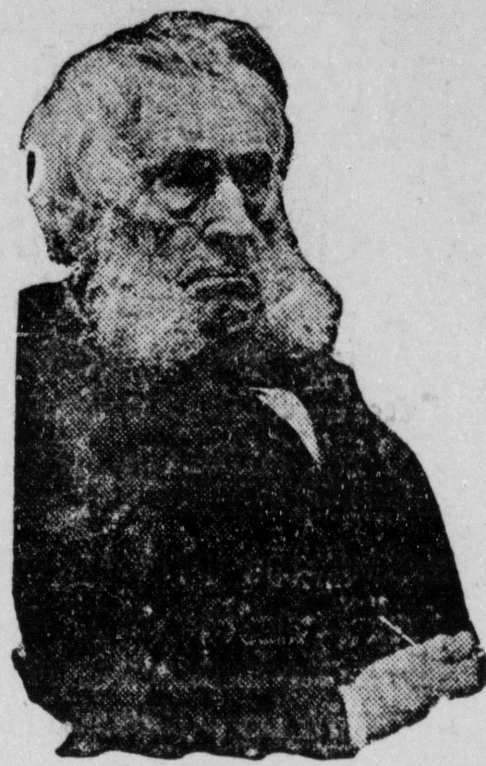

Safety razor blades, says Popular Mechanics, can be sharpened by immersing them in a solution of one part, by weight, of muriatic acid and twenty parts of water for thirty minutes, then removing them and honing each one to a polish.

Cheap Electric Railways.

Taking all items into consideration, the saving of the electric locomotive over steam working is at least equal to 25 per cent.—Engineering.

JOHN BIGELOW.

At Ninety-two Famous Author
Is Writing Another Book.

JOHN BIGELOW HAS ANOTHER BIRTHDAY

It Is His 93d, But He Is Still Alert.

New York, Nov. 26.—John Bigelow's ninety-third birthday was celebrated at Mr. Bigelow's home, 21 Gramercy Park, by his children, grandchildren and great-grandchildren, together with hundreds of personal friends who kept calling through the afternoon to wish him as many more birthdays as he had had. That part of New York is never so lively of an afternoon as when Mr. Bigelow's birthday comes around, and yesterday a record was made.

In the morning there was a reunion of the family and Bigelow was photographed with his son, Poultney Bigelow, the latter's daughter, Mrs. J. F. Aloysius Clark, and Mrs. Clark's daughter, Miss Evelyn Bigelow Clark. Telegrams and cables of congratulation kept coming all day. Besides there was a stack of letters brought by the postman or delivered by hand, and flowers kept coming almost by the wagon load, and presents by the score. The party at luncheon included only one guest besides the family, and that was J. Pierpont Morgan. In the afternoon the friends came in legions.

During the recent campaign Mr. Bigelow gave ample evidence that time had not dulled the keenness of his intellect or blunted his pen, for he made a number of important contributions to campaign literature. He still keeps as much abreast of the times as he did when, sixty years ago, he used to edit the Evening Post. Mr. Bigelow has been voting the Democratic ticket for seventy-two years, which is more than twenty years longer than anybody has the Republican ticket. He has been lawyer, editor, writer and diplomat, achieving distinction in each field.

Ten Miners Entombed.

Providence, Ky., Nov. 26.—Ten men are entombed in mine No. 3 of the Providence Coal company at this place, and little expectation of their rescue alive is entertained. The mine rescue car is on the way here from Indiana, and a practical demonstration of its appliances will be made.

Woman Hanged Herself.

Fort Wayne, Ind., Nov. 26.—Eluding the vigilance of her husband, Mrs. William Andrews, living on a farm east of this city, used a towel and hanged herself to a bedpost. She was fifty-five years old and had been in bad health.

TERSE TELEGRAMS

William J. Bryan has arrived at his farm at Mission, Tex., to spend the winter.

London speculators are betting on the possibility of Lloyd George becoming prime minister in place of Mr. Asquith.

The Austrian government has ordered that all ocean-going steamers must be equipped with wireless apparatus.

A proposal is under consideration for a state-owned cable between Great Britain and Canada at an estimated cost of £850,000.

Samuel T. Withers, aged fifty-five, second vice president of the First National bank of Lynchburg, Va., committed suicide by shooting.

Penniless and harassed by disease, B. Campbell Bakewell of Pittsburg, Pa., former well known clubman and member of a famous family, hanged himself at St. Louis.

"Queen," a circus elephant, that less than a month ago killed her keeper, Bob Shields, in New York, was put out of the way Friday. Eleven grains of cyanide of potassium did the work.

The equestrian portrait of Philip IV. of Spain, painted by Velasquez in 1623, which had been missing for 160 years, has been discovered at the Duke of Parma's country residence at Schwarau.

Cardinal Sanmiatelli, who died at Rome Thursday, bequeathed \$25,000 to establish at New York, Buenos Ayres and San Paulo boards for the protection of Italian victims of the white slave trade.

FISHING FROG CAPTURED.

Curious Specimen Becomes General on British Coasts.

The angler, or fishing frog, of which a specimen has just been captured near Brighton, England, though nowhere common, seems generally distributed around British coasts.

The angler is so called from the curious "rod and bait" formed by a modification of a ray of the front dorsal fin, which was formerly fancied to attract small fish, but the entire hideous body is a marvelous mimetic adaptation of the bottom of the sea, upon which the creature walks on its pectoral fins.

This marine ogre has little value, except for museums, but the gall is used by Irish washerwomen to bleach linen, and in Ireland it is utilized for the manufacture of soap.

A PHARAOH GAME.

A small beginning does not mean that great results may not be seen. Though there were neither monster cranes nor steam machines upon her plains, though there were no state engineers nor bond issues for many years nor sealed and graduated bids, yet Egypt built the pyramids.

PRISON SYSTEMS ASTOUND VISITOR

Convicts Better Fed Than Ma
jority of French Laborers.

"EXCESSIVE HUMANITY" NOTED

Parisian Director of Penitentiaries
Fears American Plan Would Not
Last In European Republic—Praise
For Rescue Work Among Children to
Prevent Crime.

M. Schrameck, director of the French
penitentiaries, one of the five delegates
who attended the recent congress at
Washington, has returned to Paris, and
in speaking of his trip said:

"We return astounded. We saw
prisoners in the United States better
lodged and better fed than the greater
part of the working population of
France. I do not exaggerate. They
have three meals a day and meat at
each. After eating they have coffee.
They have to work, but so little it is
not worth mentioning.

System Astounds Visitors.

"In that free country deprivation of
liberty is considered a sufficient pen
alty. An American prisoner remains a
citizen and so cannot be flogged.
His hair is not cut off, as in France,
and he is not obliged to wear a spe
cial costume. He is supposed to pre
serve the sentiment of his own per
sonality, his own individuality, so at
meals each has his own stool, while
French prisoners use forms."

M. Schrameck described the lessons
given in prisons, the prison baseball
games, etc., from which he concluded
that prisoners in America were looked
upon as wanderers from the right way
who ought to be put back on the right
road.

M. Schrameck praised the measures
taken in America to prevent criminal
ity, the children's courts and the parks
for children's play. The prisons he
thought models, but too expensive for
France to imitate.

America Has "Excessive Humanity."

"After all, every country has its own
ways. The excessive humanity of
Americans is a most praiseworthy
work. Does it give the desired re
sults? That has to be found out. I
do not think that in France such hu
manity would have much success.

"What is to be admired in the Uni
ted States, I repeat, is the care taken
to rescue the children from the street
and its temptations. To prevent the
first little crime is to stop the child
slipping down the evil slope. To pre
vent is better than to punish. There
is much to be done among us in this
direction."

DANISH WOMEN OWN CASTLE

Celebrate Defeat of Snubbers After
Forty Years' Work.

It was a proud day for the women
of Denmark when the opening cere
mony took place of the Frauenburg,
the women's castle, at Copenhagen.
Danish women are among the most
advanced in the world as regards
emancipation. They already possess
the municipal vote. Eight members
of their sex are on the Copenhagen
town council, and in all probability
complete social and political equality
with men will be granted them by the
legislature.

The women's castle is a fine big five
story edifice, which has cost \$250,000,
every cent of which has been contrib
uted by women's savings extending
over the last forty years.

Frau Zahle, aged ninety, in her in
augurating speech recalled how forty
years ago the first Danish women's
culture society humbly approached the
Copenhagen Athenaeum asking for the
loan of some books out of the latter's
well stocked library. The request was
haughtily refused.

The women took up the challenge
and replied that in forty years' time
they would have their own Athe
naeum, where men would have to ask
leave to enter. Today the new Frauen
burg has a library of 62,000 volumes.

CRETANS FIRST IN PRINTING.

Discoveries Show They Practiced Art
Four Thousand Years Ago.

Not long ago it was asserted on what
seemed to be fairly good evidence that
the ancient Egyptians had some knowl
edge of electricity. Now another "mod
ern" invention has been robbed of its
youth by a recent discovery made in
Crete.

Excavators have unearthed at Pha
cotos a disk of clay six and a quarter
inches in diameter which bears on its
two sides 120 figures of men, animals,
trees and other things which consti
tute the earliest hieroglyphics used in
Crete. These representations are not
engraved, but clearly stamped with a
punch.

It is a true sample of typography
and dates from the twentieth century
before the Christian era. Printers
therefore will have to look for the
cradle of their race not to Gutenberg,
but to Crete, where their art was prac
ticed in a primitive way 4,000 years
ago.

Friction Felling Trees.

For felling trees with as little waste
as possible a German inventor has de
vised a machine which cuts through
their trunks by the friction of a steel
wire driven at high speed by an elec
tric motor.

JACOB A. RIIS.

To Tour Country in
Behalf of Roosevelt.

ROOSEVELT'S FRIEND EXTOLLS BEVERIDGE

Jake Riis Says Senator Is More
Alive Than Ever.

Indianapolis, Nov. 26.—"It made me
laugh to hear some people say that
Senator Beveridge is dead politically as
the result of the recent election,"
said Jacob A. Riis of New York, who
passed through on his way to Martins
ville to deliver a lecture. Mr. Riis is
the biographer and close friend of
Theodore Roosevelt. "I told them,"
he continued, "that Senator Beveridge
was a bigger man and was more alive
today than he ever was and that he
would be heard from. I am a great
admirer of Mr. Beveridge."

Mr. Riis believes that the election
results did not hurt Mr. Roosevelt.
"Inside or outside the White House,"
he said, "Mr. Roosevelt is and will re
main the leader of the great progres
sive movement. The result of the
election was in no way against him."

"Will Mr. Roosevelt be the next Re
publican candidate for the presiden
cy?" Mr. Riis was asked.

"That is all newspaper talk," said
Mr. Riis. "Mr. Roosevelt has said
nothing on the subject of candidacy.
But personally, I would not be sur
prised if he were the candidate at the
next presidential election."

Drastic Regulation Demanded.

Atlantic City, N. J., Nov. 26.—Dras
tic regulation of all of the railway
lines of the country, with sweeping
powers permitting the interstate com
merce commission to nullify freight
and passenger rates shown to be ex
ortionate, were demanded in resolu
tions adopted amid volleys of applause
at the closing session of the National
Grange Patrons of Husbandry.

Seeking to Prevent Wrecks.

Champaign, Ill., Nov. 26.—As a re
sult of the disastrous interurban wreck
on its lines at Staunton, the Illinois
traction system has arranged to in
stall 100 miles of electric block sys
tem on its Peoria-Springfield division.
If this signal system proves satisfac
tory the entire system will be similar
ly equipped.

She Was Tired of Living.

Marion, Ind., Nov. 26.—Mrs. Fannie
Hedrick, aged fifty-six, ended her life
at Van Buren by taking poison. She
had been despondent since the death
of her husband two years ago. Mrs.
Hedrick was prominent in Van Buren
and had ample means.

\$50,000,000 FOR PARIS APPETITES

Large Annual Outlay of French
Capital For Food.

COST OF LIVING INCREASING.

Horse and Mule Meat Among Delica
cies, While 1,562,000 Pounds of Snails
and Crawfish Are Purchased by Epicu
res—One-tenth of Total Spent For
Meat, With Fowls Close Second.

Now that the increasing cost of liv
ing is giving the residents of the
French capital not a little anxiety it is
interesting to note the enormous quan
tities of meats, vegetables, butter,
cheese, fruits, etc., that are annually
consumed in Paris.

Dealers in horse and mule meat are
compelled by law to indicate by means
of a sign of a horse's head over the
front of their places of business that
they deal in horse meat. This is to
protect the unsuspecting public, who
frequently are unable to distinguish
between beef and horse meat.

According to reliable statistics, Paris
consumes in a year 347,600,000 pounds
of beef, veal and mutton. To this
must be added 79,200,000 pounds of
pork and 8,800,000 pounds of pork
products. In these pork products are
included the sausages, headcheese and
various preparations and mixtures of
meat.

In addition to this, say the consular
and trade reports, the consumption of
horse and mule meat is quite large. In
fact, each year 29,700,000 pounds of
horse and mule meat are consumed,
representing about 61,000 animals.
The total amount of meats of all kinds
consumed annually in Paris reaches
the significant figures of 455,400,000
pounds.

The amount of poultry eaten in Paris
annually reaches 48,400,000 pounds,
representing about 15,500,000 pieces.
The consumption of game attains 3-
300,000 pounds, corresponding to more
than 2,000,000 pieces. Large numbers
of rabbits are also fed and fattened
for the market and form a considera
ble quantity of food.

That the Parisians are also formida
ble fish eaters is shown by the num
ber of pounds sold annually as fol
lows: Salt water fish, 57,029,800;
fresh, 6,582,400; smoked, 343,200; salt
ed, 22,000; total, 63,977,400. Oysters,
mussels, shellfish and snails also find
numerous epicures, for their consump
tion is relatively important—25,300,000
pounds of oysters, mussels and shell
fish and 1,562,000 pounds of snails and
crawfish.

The consumption of vegetables in
Paris reaches the following imposing
figures: General vegetables, 30,800,000
pounds; mushrooms, 8,800,000 pounds;
watercress, 13,200,000 pounds.

As to butter and eggs, Paris con
sumes of the former annually 33,000-
000 pounds and of the latter 55,000,000,
and this notwithstanding the fact that
both these products command through
out the year an extremely high price
and are principally produced and ship
ped in from the provinces.

Eggs From America.

Of late years Paris is consuming
many eggs imported from Germany,
which country in turn buys from Rus
sia, England, Italy and America.

The consumption of fruit reaches
46,200,000 pounds a year. All fruit in
Paris is sold by weight, the lowest in
price being 5 cents a pound and rang
ing from that figure to 40 cents a
pound. Bananas always command a
high price and are of inferior quality.

As to cheese, which is never exclu
ded from a regular meal in France, the
annual consumption reaches 37,400,000
pounds.

The total value of food products in
the French capital in a year of the
kinds mentioned and not including
wines and bread is as follows: Meats,
\$10,711,000; fowls, \$9,788,000; game,
\$769,000; fish, \$4,100,000; oysters,
snails, etc., \$1,153,000; vegetables, \$2-
410,000; butter, \$8,265,000; eggs, \$5-
961,000; fruits, \$1,730,000; cheese, \$4-
269,000; total, \$49,156,000.

It can be affirmed without any exag
geration that Paris spends annually
for its nourishment the above total,
not including the enormous sums paid
out for bread and wine, these being
the chief articles of diet of the poorer
classes.

NO JOKES CAUSE INDIGESTION

Indianapolis Auctioneer Mayor to Try
Goats' Milk Cure.

Mayor Shank of Indianapolis is pre
paring to drink two quarts of goats'
milk daily as a cure for indigestion
and is satisfied that if a cure results
he will be able to stay in his office
longer and therefore transact the busi
ness of the city more expeditiously.

He has gathered statistics showing
that goats' milk if taken in sufficient
quantities will cure the disease, and he
is going to try it.

The mayor says that as an auction
eer he was never troubled with any
thing, but the majority gives few op
portunities for cracking jokes, and he
attributes his indisposition to the fact
that there are not as many laughs in
the mayor's business as there were in
cracking sales.

EDWARD A. REMY, P. M.

How He Did It.

Robert J. Burdette when a boy was
lecturing his younger brother, John,
one evening about sleeping with his
mouth wide open.

"Johnny," said Bob, "you will never
live to be married if you sleep with
your mouth open. You'll die of con
sumption if you don't stop."

"But you sleep that way sometimes,"
replied John.

"Yes, that's true," replied Bob, "but
whenever I find myself sleeping that
way, with my mouth open, I get up
and shut it."

In Sudden Emergencies

like illness, it is often necessary
quickly to raise the temperature of a
room. For instance, in those hours
between midnight and dawn, when
the day temperature has been allowed
to drop, if you are called upon to
get up, the room is chilly and cold.
It takes a long time to start up a
furnace or fire and raise the tempera
ture by ordinary means.

You can instantly heat a room to
any desired temperature with a

PERFECTION
SMOKELESS
OIL HEATER
Absolutely smokeless and odorless

It quickly gives heat, and with one filling of the font burns
steadily for nine hours, without smoke or smell. Has auto
matic-locking flame spreader which prevents the wick
from being turned high enough to smoke, and is easy to remove
and drop back, so the wick can be cleaned in an instant. It has a
cool handle and a damper top.

An indicator always shows the amount of oil in the font. It has a filler-cap
which does not need to be screwed down; it is put in like a cork in a bottle, and is
attached to the font by a chain.

The burner body or gallery cannot become wedged, because of a new
device in construction, and consequently it can always be easily unscrewed in
an instant for reworking.

The Perfection Oil Heater is finished in Japan or nickel. It is strong, durable
and well made, built for service, yet light and ornamental.

Dealers Everywhere. If not at yours, write for descriptive circular
to the nearest agency of the

Standard Oil Company

SATURDAY, NOVEMBER 26, 1910.

St. Paul Church.

Sunday School at 9 a. m. German Divine Worship at 10:15 a. m. and English service at 7:30 p. m. Sermons by the pastor, Rev. H. R. Booch. Everybody is welcome.

The gloves which were left in the St. Paul church Thursday evening may be received by owner by calling at the parsonage.

First Baptist Church.

Bible School at 9:15. B. Y. P. U. at 6:30 p. m. Divine Worship at 10:30 a. m. and 7:30 p. m. Subject for the morning "The Office of the Understanding and the Affections in Religion." Evening: "The Trial of Jesus."

Thank Offering.

The Woman's Home Missionary Society of the M. E. Church, will hold their annual thank-offering service Sunday evening at the church. Dr. Doddridge, of Jeffersonville, will deliver the lecture. All are cordially invited.

Nazarene Church.

Sunday School 9:30 a. m. Preaching 10:30 a. m. and 7:00 p. m. Prayer service 6:30 p. m. Prayer meetings the coming week on Tuesday and Friday evenings at 7:30. All are welcome.

If you wish to do more and better work and enjoy life you should consult Dr. Spaulhurst, the Osteopath and get an honest opinion of the cause of your ailment. Dr. Spaulhurst will be here, himself, next Monday.

C. H. Adamson, who for several years has been local agent at the Southern Indiana, has resigned his position with that company and will act as local agent for the Monon railway. The position taken by Mr. Adamson has been recently created for him, the duties of the office has theretofore been taken care of by General Agent Humston. He will begin his duties next Monday.—Bedford Mail.

Many school children suffer from constipation, which is often the cause of seeming stupidity at lessons. Chamberlain's Stomach and Liver Tablets are an ideal medicine to give a child, for they are mild and gentle in their effects, and will cure even chronic constipation. Sold by Andrews-Schwenk Drug Co.

The Pimpernel.

Not every one knows what flower is meant by the pimpernel in the famous lines:

The white lake blossom fell into the lake As a pimpernel dozed on the leaf.

It is a pretty English wild flower of the primrose family and commonly known as "poor man's weather glass," because its petals are so sensitive to moisture that they droop before the coming of rain. Garden burnet is sometimes confounded with this English plant because it is called by the French "pimpernelle." But the pimpernel which "dozed on the leaf" is a slightly poisonous, acrid plant, not at all suitable in a salad.—London Spectator.

The Police System.

The police system, being almost entirely municipal in its character, has gradually developed with the growth of cities. In London a night watch was appointed in 1253 to proclaim the hour with a bell before the introduction of clocks. The old watch system was discontinued and a new police on duty day and night commenced Sept. 29, 1829.

Twenty-fifth Anniversary

We extend a most cordial invitation to our many friends and patrons, far and near, and desire their presence on

Tuesday Evening, November 29,
at Our Twenty-fifth Anniversary Reception

The Store will close at noon Tuesday to prepare for this occasion, and will open to the public from seven to ten p. m.

The store will be beautifully attired and business will be suspended for this evening.

We know of no better way to show our appreciation to our many friends and customers, who have stood with us for the past twenty-five years, than this public reception and display.

Our success is due to the confidence that you have placed in us, and the untiring effort of our management to produce values, honorable dealings, and fair and just treatment at all times.

We extend a hearty welcome to ALL and hope to greet you **TUESDAY EVENING** at the

GOLD MINE DEPARTMENT STORE
SEYMOUR, INDIANA

MUSIC 7:00 TO 10:00 P. M.

School Will Be Resumed.

The Laurel street school, where school has been dismissed for several weeks on account of diphtheria, has been thoroughly disinfected by the Board of Health and school will again be resumed there Monday. Those who attend school there will please take notice and be in their proper places Monday.

When a cold becomes settled in the system, it will take several days' treatment to cure it, and the best remedy to use is Chamberlain's Cough Remedy. It will cure quicker than any other, and also leaves the system in a natural and healthy condition. Sold by Andrews-Schwenk Drug Co.

Mr. and Mrs. Wright Payne went to Brownstown this morning to attend the funeral of Mrs. Mary Barkman.

Miss Rhoda Wicker went to Ft. Ritner to spend Sunday.

BETTER THAN SPANKING

Spanking does not cure children of bad wetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box W. Notre Dame, Ind., will send free to any mother her successful home treatment, with full instructions. Send no money, but write today if your children trouble you in this way. Don't blame the child, the chance as it can't help it. This treatment also cures adults and aged people troubled with urticaria by day or night.

A Country of Earthquakes.

Japan is peculiarly the victim of ele-
mental forces. The only satisfaction
its people can derive from living in a
country which contains fifty-one active
volcanoes and has an average of about
500 earthquake shocks yearly is that
in all probability Japan would never
have existed but for the seismic and
volcanic agency which has elevated
whole districts above the ocean by
means of repeated eruptions.

PERSONAL.

Mrs. J. M. Lawson of Sparksville,
was here today.

Mrs. Joseph Hedges and children
have returned from a visit at Hayden.
Henry Smith was here from Sul-
phur Springs this morning for a short
time.

William Hunsucker of Vallonia,
transacted business in Seymour this
morning.

Mrs. Will Hopple and Mrs. Jesse
Williams are spending a few days in
Indianapolis.

Rev. F. M. DeMunbrun, of Fleming,
was in the city this morning for a
short time.

Misses Flo Beldon and Martha
Fultz, of Crothersville, went to
Brownstown today.

Mrs. T. J. Plummer of Sparksville,
has been here the guest of her broth-
er, William Sullivan.

J. R. Baldwin and wife, Mrs. Rud-
dick and Mrs. Sarah Shields, of Red-
dington, were here today.

Harry Cordes, of Aurora, came
home today to attend the funeral of
his cousin, Miss Elsie Cordes.

Mrs. J. E. Graham and Mrs. John
Ross went to Crothersville to attend
the funeral of Joseph Schuler.

Mrs. James Goforth returned from
Tunnelton this morning where she has
been visiting for several days.

Misses Grace and Lura Swain of
Eden Valley, have been visiting at
Riley Swain's at Reddington.

Mrs. John Hauenschild and child
went to Indianapolis this morning to
visit her sister for several days.

Miss Opal McShane of Tipton, re-
turned home today after a visit at
Louis Gossman's at Brownstown.

Mrs. Charles Shotts, of Terre
Haute, who has been visiting friends
here, returned home this afternoon.

Orville Bottorff and J. C. Howell,
manager of the Majestic, spent the
day hunting on M. F. Bottorff's farm.

Mr. and Mrs. Verner Kern, of Fay-
etteville, are guests of Mrs. Effie Love
and daughter, Miss Grace for several
days.

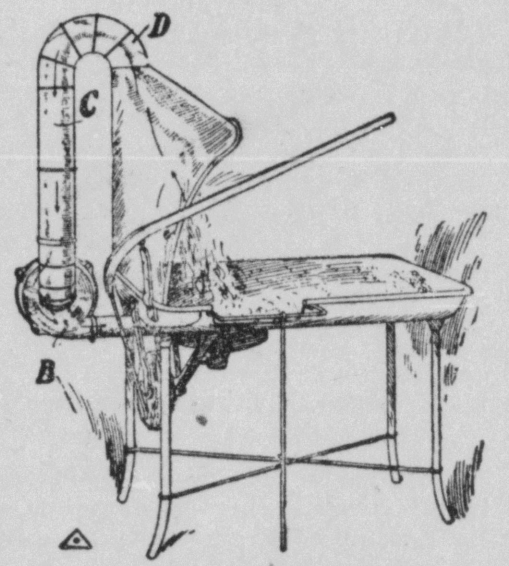

Linus Tupmann, of Cincinnati, who
has been spending Thanksgiving with
friends here, returned home this
morning.

SMOKE BURNING FORGE.

Device That Provides a Better Utiliza-
tion of Coal.

Coal smoke is nothing else than un-
burned carbon. When great clouds of
smoke go up from a forge heat is
wasted, writes a correspondent of Popu-
lar Mechanics. I hit upon an idea
to prevent this waste and worked it
out, as shown in the sketch, success-
fully.

Using a common forge with hood at-
tached, I connected at D a tin pipe of

FORGE THAT BURNS SMOKE.

the same size as the opening into the
suction side of the blower, as shown
at C. When the blower is in use the
smoke that rises from the fire passes
in the direction of the arrows back
through the blower and up to the fire
without escaping into the open. By
using this method I have been able to
get much more heat out of a given
quantity of coal.

Traveling Telephones.

The military authorities in India
have made use from time to time of a
form of movable telephone which can
be employed with great facility in the
field. The cable weighs only seven
pounds per mile, but it is so well in-
sulated that it can be stretched across
a stream without loss of current. It
withstands a strain of 120 pounds.
An apparatus for placing and remov-
ing the cable, working automatically
and capable of being attached to a
saddle, is employed. Recently in the
Punjab a horseman, proceeding at a
gallop, placed the cable over a dis-
tance of two miles in seven minutes.
To remove it eighteen minutes were
required.

Our Motto This Year is—"THE BEST YET."

Christmas is Just Around the Corner.

Getting ready has kept us pretty busy for the last while back.
We are going to be able to show you people our best-yet
Christmas display this year.

It is going to be larger than before and better selected.

It is going to be more attractive, too, and in every way
more worthy of your very best interest.

This Ad is to acquaint you in advance with our intentions.

In a week or so we will print the word "READY," which
will mean everything is ready for you, down to the
smallest item.

If you will save your wants in our line for us, we will
promise to let you do your choosing from a stock that
will represent the latest thoughts in Holiday Jewelry.

Don't forget to wait.

And don't forget to call.

LEG FRACTURED

William Weddell, of Medora, Meets
With Serious Accident.

William Weddell, of Medora, met
with a serious accident about noon
Friday which resulted in a compound
fracture of his right leg, and it is
feared that amputation may be neces-
sary. He was driving the "dump
cart" at the brick yard and in some

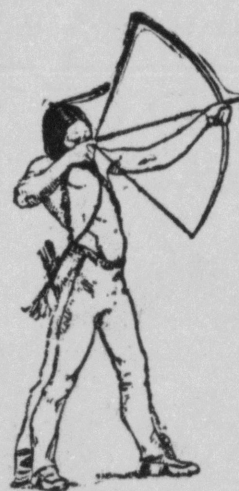

manner it was overturned. When he
attempted to jump from the wagon,
his foot caught in the lines, and the
shaft with the weight of the horse
fell on his leg. Drs. George C. Ray
and Neal Matlock were called, and
found that his leg had been broken in
two places, and it is feared that it
may be necessary to amputate it.

Mrs. Harley Jackson spent the day
in Columbus.

DEEP WATER WAY MEN IN TURMOIL

Exciting Scenes Mark Meeting
At St. Louis.

GOV. DENEEN STARTS STORM

Illinois Executive's Advice to the Convention Not to Start Anything That Would Antagonize the Federal Government Created Storm of Protest—When President Kavanaugh Scored Taft the Convention Was Delighted.

St. Louis, Nov. 26.—Judging from indications on the floor of the convention hall where the Lakes to the Gulf Deep Waterways association is in session, the delegates will unanimously endorse the fourteen-foot-through-the-valley project and nothing less than that. An uproar occurred when Governor Charles S. Deneen of Illinois mounted the platform and said that if the convention antagonized the federal government they would gain nothing and that the best thing to do was to await the decision of the federal investigating committee. This was followed by many cries from the 3,500 delegates present of "No, no, we know what we want"; "Give us fourteen feet and nothing less," and so on.

In his opening address President Kavanaugh bitterly scored Mr. Taft, openly charging that he was not favorable to the idea proposed by the delegates, but was a booster for his own little old Ohio river. Kavanaugh's remarks caused a demonstration the like of which has never before been equalled in this city, hats flying in the air, men shouting, whistling, cheering, and women waving handkerchiefs. A later address that created enthusiasm was that of Edward A. Halsey of Chicago, chairman of the river improvement committee of the Real Estate Exchange of Chicago. Halsey said: "If the convention does not stand for fourteen feet through the valley, then every delegate who votes against that plan thereby, in my judgment, disqualifies himself forever after to being called a deep-waterways man."

The demonstration following this assertion was deafening, requiring continued efforts on the part of President Kavanaugh to check it, only to break out again and again. Halsey recalled the remarks of Theodore Roosevelt: "We will build the lakes-to-the-gulf deep waterway in the same way that we are building the Panama canal—honestly."

An exciting contest bordering on riot between Governor Deneen and Senator Lorimer for control of the Illinois delegates to the convention, was the center of interest for forty-five minutes. Deneen won when his nominee, Isham Randolph, who represents his policy of immediate waterway work in Illinois, was elected to the resolutions committee over Lorimer's candidate, Congressman Henry T. Rainey. Lorimer favors waiting until the federal government makes an appropriation before beginning to spend the proceeds of Illinois's \$20,000,000 bond issue for river improvement. The Illinois fight followed a similar contest in the Missouri delegation, in which David R. Francis supported Leo Rassieur as a member of the resolutions committee and had the satisfaction of electing him over the head of his recently victorious antagonist in the senatorial primaries, James A. Reed.

HE HAS NO FEAR

Caleb Powers Not Disturbed Over Talk of Unseating Him.

Frankfort, Ky., Nov. 26.—Friends of Caleb Powers say that he is not disturbed about the talk that the new Democratic house will not permit him to take his seat. It is understood that the congressman-elect from the Eleventh district takes the position that his candidacy was submitted to the voters of the Eleventh district and that he was elected by a majority of about 9,000 votes. His friends assert that he is not afraid of being turned out of congress, even by a Democratic house. Thus far no Democratic member of the house has declared that Powers should be turned out. Up to this time the question has only been discussed by the newspapers.

Thwarted Hold-Up Men.

Huntington, Ind., Nov. 26.—While driving home with his girl from this city, Francis Brown was attacked by two holdup men. He fought them off with a revolver.

DOGFISH ARE DESTROYING NOVA SCOTIA'S FISHING.

Appeal Made For Method of Destroying Pest of Ocean.

Veteran fishermen working out of Yarmouth, N. S., report dogfish more numerous than at any period in the history of the fishing industry in that section.

They report them great pests and that if something is not or cannot be done to destroy them a few years will see the ending of that vocation so far as the south shore fishing grounds along the Nova Scotia coast are concerned. The Yarmouth fleet in past years would go out twenty to forty miles and with three or four days' good fishing weather would return with \$500 and \$600 worth of good fish. This season they are out fully a week and come in and feel grateful for half that amount.

During the summer of 1910 the dogfish rendering works operated double shift, night and day forces, and yet were unable to consume all the dogfish brought in. Thousands of pounds of these fish have been reduced to oil and fertilizer substances, and yet the pests show no decrease, but rather a constantly increasing supply.

These dogfish not only play havoc with the cod, haddock and other desirable fish, but are very detrimental to mackerel and lobsters. They not only take the bait and escape, but when "hooked" it is not possible for the men at sea in their dories to destroy them, as they do not often have the time, especially in high seas or when a storm is coming. They are also very destructive to gear, causing much loss of money in that way. Fishermen would hail with joy some one who would come forward with some practical method of doing away with these pests.

CHRYSANTHEMUM IS SCENTED

Englishman Succeeds in Perfuming Popular Flower.

A chrysanthemum with perfume is one of the newest things in flower culture. What is still more striking, 400 such buds grow on one tree, and all are of a pale rose color.

Chrysanthemums are gorgeous flowers, but what might have been called an imperfection in them is their lack of perfume. This has been changed by an Englishman named Broomhead, who worked for many years seeking to evolve such a plant. He modestly admits this success was largely a thing of luck, but his explanation of how it was done really is an interesting story.

"For a long time," said he, "I have tried mixing the essence of flowers in the hope of finding a new variety. This is done by taking the dust from the anthers of one flower and sprinkling it in the stigma of another. But you may keep on doing this for many years without success."

"The seed of a combination may only produce an ordinary flower, but one day the 'flower chemist' may wake up and find he has a fortune in a flower. That is what has happened to me. I knew I had something out of the ordinary when I became aware of the delicious perfume. Other growers can produce the same bloom now by purchasing the seed, but they cannot solve the secret of the yellow dust used in its original cultivation."

CALENDAR MAY BE REVISED.

Swiss to Summon All Nations to Regulate Days.

The movement for the reform of the Gregorian calendar seems to be taking a more tangible shape than heretofore. The Swiss federal council will invite all the nations to a conference at Berne with a view to adopting an arrangement by which every year will be divided into exactly fifty-two weeks or 364 days.

New Year's day is to be an "extra day." Sunday will bear no date. The four quarters of the year are to be exactly of the same length—the months, thirty, thirty and thirty-one days successively. Thus the 31st day of March, June, September and December would always fall on a Sunday.

Every leap year would have an off day that would neither be counted nor dated. It would be inserted between June 31 and July 1.

ICE HARBOR IN OHIO RIVER.

Government Builds Refuge For River Craft Near Cincinnati.

In connection with the million dollar dam that has been constructed in the Ohio river twelve miles below Cincinnati the United States government has built an ice harbor in which the river craft may take refuge in the winter and early spring from the masses of floating ice that have caused millions of dollars' worth of damage in past years.

The harbor is solid concrete, re-enforced with steel, and is the first to be built in the Ohio. It is large enough to afford ample protection against ice runs to all the craft in its vicinity.

Combines Art and Comfort.

A German artist carries a portable house about with him on his automobile on painting tours.

THE ACCELEROMETER.

An Instrument That Measures Power and Road Resistance.

In a paper on the use of an accelerometer in the measurement of road resistance and horsepower, read at a recent meeting of the engineering section of the British association, H. E. Wimperis described the form of accelerometer recently invented by him.

The instrument consisted of a brass box about four inches across, containing a copper disk mounted on a vertical pivot and "damped" in its motions by a permanent magnet. The center of gyration of the disk was purposely removed from the axis, so that when the box moved forward one side of the disk tended to lag behind, thus partially winding up a coiled spring and actuating a pointer, which moved over a scale. To prevent the reading from being affected by any accelerations at right angles to the direction of motion, a second parallel axis was fitted, which was geared to the first one and had attached to it masses having the same mass movement as the disk itself. Couples about these two axes added up in the direction of motion, but neutralized one another in any direction at right angles. The accelerometer, therefore, read in one of the three directions of space only and was not affected by even violent movements in the other two directions.

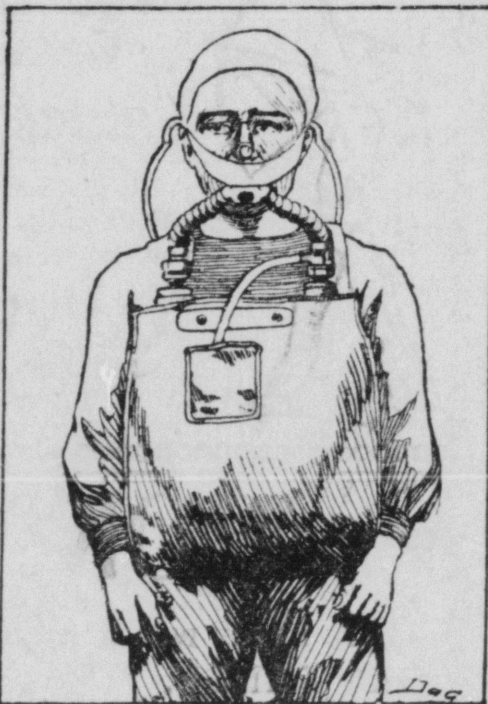

With this instrument the author had measured the road resistance of various classes of road and had obtained figures varying from 50 pounds to 210 pounds per ton. On main line railways the resistance was usually from twelve pounds to thirty pounds per ton, depending on the speed. Measurements had also been made of the resistance to motion when a motorcar was coasting. In this way the horsepower and the engine friction could be measured and a figure for the mechanical efficiency could be obtained. By the use of the accelerometer road resistances could be read off at sight, the air resistance of various shapes of car body could be determined, the boiler horsepower and indicated horsepower of the engine could be obtained for various speeds, while it was possible to trace step by step the losses of power in transmission to the road wheels.

MINE RESCUE DEVICE.

Apparatus Permits Men to Work For Hours in Deadly Gases.

Experiments at the Lancashire and Cheshire miners' rescue station, Atherton, the first station of its kind in Great Britain, have developed a rescue apparatus with which it is said that the men so equipped can work for five or six hours in the most deadly gases without the slightest inconvenience or exhaustion.

The weight of the apparatus is twenty-eight pounds, but nearly all

FRONT VIEW OF RESCUE APPARATUS.

this weight is borne by a belt around the waist, says Popular Mechanics. The feature of the device is the absence of a helmet. A headpiece, provided with straps, holds the mouthpiece in position over the chin at 1 lips, and a light clamp fits over the nose, closing the nostrils. The supply of air is drawn from the breathing bag, which hangs down from the shoulders in front, through pipes leading to the mouthpiece. The exhaled breath is carried by another pipe to a receptacle filled with caustic soda, by which the poisonous gases are absorbed. Goggles are worn to protect the eyes.

A New Explosive.

Cheddite, an explosive that has been extensively used for the past ten years in Europe, is about to be introduced in Canada, says Mines and Minerals. The explosive will not freeze and is practically nongaseous. It will burn in the open air without explosion. Nitric, hydrofluoric and sulphuric acids when poured over the powder do not cause it to explode. Nitric acid has no effect on it whatever, but it effervesces under the action of hydrofluoric acid and burns brightly when sulphuric acid is poured over it. When it is charged in a drill hole and exploded the smoke is not injurious, and men can go back at once to their working places without even obtaining a headache.

Color of Sparks.

The color of the sparks given off by an emery wheel is a guide to the kind of metal being ground. Sometimes this is the most easy and handy way of distinguishing tool steels. Cast iron gives off dull red sparks, and they stay close to the emery wheel. Wrought iron gives a spark similar to cast iron in color, but more like the spark from mild steel, which is bright yellow and flies from the wheel considerably. Self hardening tool steel and the tungsten alloy steels make a thick shower of dull sparks, very much like the cast iron sparks in color.

PURDUE'S NEEDS WILL BE URGED

Legislative Committee to Be Asked For Many Things.

LIBRARY IS PRESSING NEED

At Present There Is No Adequate Provision Made For Caring For Books, and This Will Be Laid Before Visiting Committee—Soldiers' Home at Lafayette Also Has Some Urgent Needs Which Will Be Presented.

Lafayette, Ind., Nov. 26.—When the legislative committee of the general assembly arrives here to visit Purdue university and the soldiers' home, President Stone of Purdue and Commandant Haggard of the home will, respectively, present the needs of the two institutions. Purdue is badly in need of a library building. The present structure serves as the registrar's office, students' chapel and also for classrooms, and it is not possible so to arrange the volumes that they can be handled easily. The rapidly growing collection of books is stacked in piles out of reach of those who might wish to use them. In every respect the library is behind the times, and a library building is the university's greatest need. It is said that an appropriation will also be asked for the dairy department, which is now housed in the main agricultural building, using the basement. There is talk of an armory being asked for, as the present one is an old wooden building not large enough to hold the student cadet corps. There are various other needs, and Purdue looks for a substantial recognition by the general assembly at the coming session.

The state Soldiers' Home is badly overcrowded and the principal request will be for a new dormitory that will accommodate 100 persons, with living and sleeping quarters. Another important need is a nurses' home. The nurses now occupy quarters in the hospital, which is not large enough for this purpose, all the room being needed for patients. Commandant Haggard will ask an appropriation for such a home and also one for repairs and improvements on the present buildings. The total enrollment at the home is above the 1,400 mark and is growing rapidly. Many are being kept on the waiting list because there are no accommodations for more than the present number.

THEY MUST PAY

Jury Finds For Plaintiff Against Saloon Keepers.

Greenfield, Ind., Nov. 26.—The suit by Mrs. Alta M. Ward against the Terre Haute Brewing company, Claude D. Miller, a saloon keeper, and David O'Donnel, his bartender, for \$10,000 damages, resulted in a verdict for the plaintiff of \$3,500. It was alleged in the suits that the defendants sold liquor to her husband until he became intoxicated and shot and killed Thomas McIntyre, for which he is serving a life sentence in prison. The case came to this county from Marion county on change of venue.

MUST LEARN OVER AGAIN

Surgical Operation Leaves Editor in Mental Condition of a Child.

Fort Wayne, Ind., Nov. 26.—Following a successful surgical operation for the removal of a tumor from the brain, Jesse V. Taylor of this city is in the mental condition of a five-year-old child. Taylor was editor of an agricultural publication when a strange development resulted in an almost complete loss of memory. Physicians say that Taylor must now begin to learn as a little child would, and that it will be necessary to start anew in teaching him. Physically he is as well as ever, but there is small hope of his complete mental recovery.

Old Police Chief Remembered.

Indianapolis, Nov. 26.—It is announced at the office of the governor that Thomas F. Colbert, former chief of the Indianapolis police department, has been appointed superintendent of public buildings and grounds, the appointment to become effective Dec. 10. Colbert will succeed Charles J. Wheeler of Noblesville, who was named for the place eighteen months ago.

Farmers Killed Boy Trespasser.

Madison, Ind., Nov. 26.—Herman Jones, aged fifteen, who was shot by Ben Roberts Thursday for hunting on his farm, is dead. Roberts objected to hunters running over his farm. The boy did not go away when ordered and the shooting followed.

Teachers Meet at Evansville.

Evansville, Ind., Nov. 26.—Several hundred teachers from the counties of southern Indiana are present at the annual convention of the Southwestern Indiana Teachers' association, which will close a two-days' session here today.

Fell From Streetcar.

Danville, Ill., Nov. 26.—Perry Lewis, an attorney of Covington, Ind., fell from a streetcar near the Soldiers' Home and was seriously injured. His head was cut and one ear was almost torn off.

KANSAS.

Population 1910.....	1,590,949

Population 1900.....	1,470,495
Population 1890.....	1,429,122

ONLY COMPLETE CENSUS OF INDIANS TAKEN IN 1910

Shows That Navajos Have Always Practiced Polygamy and Profited.

The Indian census of 1910 will be the only enumeration of the red men in this country which will be near correct. It will be the first census taken in which are recorded not only the names of the Indians and their ages and family relationship, but also in it will be incorporated all the tribal data that can be gathered.

In this work the educated Indians have played a prominent part, and the 1910 census relating to the red men will contain a vast amount of interesting data concerning Indian population of the country, which is largest in Arizona.

For instance, this data will show that the Navajos practice polygamy and have since before their history was begun by the white man. Their reservation covers many square miles of northeast Arizona and a portion of northwestern New Mexico.

And in connection with this practice it will also be shown that the more wives a Navajo buck has and the more papooses the richer he may be. For it so happens that in the recent land allotments made by the government the proportion of ground is granted to each and every Indian, irrespective of whether he be the head of a family or a one-year-old child.

One-quarter section of land is given to each child, man or woman, and thus the Navajo with thirteen wives and forty children is in luck, while the bachelor brave with no wife or child is cut down to a measly 160 acres of land.

The process of rounding up the Indians, tabulating them and their rights to these quarter sections of land is necessarily slow in working out.

CRAWLING STONE IS SACRED.

Remarkable Phenomenon in Wisconsin Revered by Indians.

In the northern part of Wisconsin is a large lake whose waters abound in fish. In this lake there is also a great rock which floats about in its waters. This rock is held by the Chippewa Indians as a sacred monument to the Great Manitou.

Stories are told generation after generation that this great rock was at one time the throne of the Great Spirit. Here he sat and ruled the people, the animals of the forest around and the fishes of the waters of this lake. As time went by this rock was gradually being worn away, and the Great Spirit had to go to a new home.

Every summer the Indians hold dances near the place where the rock stands. This they do to celebrate the time when the Manitou took his leave. They bring food and tobacco and place them on the rock, so if the Great Spirit does not get enough to eat in the other world he comes down and gets the food that is placed by his former subjects.

No white man is allowed to catch fish in this lake, for the fish were put there by the Great Spirit for the Indians only. The rock floats about, being pushed by the waves; hence the name Crawling Stone lake.

ALL PARIS MAY GO ARMED.

That Is, All but Apaches, According to New Plan.

A proposal to arm all honest men and disarm the apaches is under serious consideration by the Paris police, who are at their wits' end to suppress that criminal fraternity.

M. Honorat, chief of the first division at the prefecture of police, is occupying himself particularly with the project. He points out that the law forbids the carrying of arms, but in practice every apache is armed with a revolver or two and a couple of daggers, while respectable folks as a rule go unarmed.

M. Honorat proposes that for a year prefects, subprefects, mayors and police magistrates shall be authorized to issue a permit to every man of respectable character to carry arms and that the police shall have power to search suspected persons for arms.

In addition he would arrange that except during working hours no one should be allowed to carry tools or implements that might be used as weapons.

HUGE RESERVOIRS FOR OIL.

California Building Pair to Hold Million Gallons Each.

Two concrete reservoirs for oil, said to be the largest in the world, are in the course of construction at San Luis Obispo, Cal., each of which will have a capacity of 1,000,000 barrels of oil. The reservoirs are to cost \$500,000, and the oil to fill them will be piped from the Bakersfield, Maricopa, Coalburg and Midway wells.

When the tanks are filled the oil in them will flow by gravity to the pumping station at San Luis Obispo, and from thence will be pumped directly to the tank steamers at Port Harford.

Millions in Ostrich Feathers.

Ostrich feathers to the value of \$8,000,000 have been exported from the Cape of Good Hope in one year.

— The — Scrap Book

Both Sick.

An English police official told a Buffalo reporter that he was most impressed in America by the grandeur of Niagara falls and the sobriety of the American people.

"We have no such sobriety across the water," said the Scotland Yard detective. "Our slums of a Saturday night are horrible. It's the beer, you see. British beer is as strong almost as American whisky. They tell a story about two British beer drinkers. One said to the other:

"I've been very sick, George. For two days little pink snakes and frogs and lizards were crawling all over me."

"Been sick?" said George. "Why, man, you're sick still. Pink swarms of 'em are crawling all over you now."

She Made Home Happy.

"She made home happy"—these few words read

Within a churchyard, written on a stone. No name, no date; the simple words alone told me the story of the unknown dead. A marble column lifted high its head. Close by, inscribed to one the world has known;

But, alas, that lonely grave with moss o'ergrown

Thrilled me far more than his who armies led!

"She made home happy." Through the long, sad years

The mother toiled and never stopped to rest

Until they crossed her hands upon her breast

And closed her eyes, no longer dim with tears.

The simple record that she left behind

Was grander than the soldier's to my mind.

—Henry Coyle.

He Was Eligible.

"Some men bear seasickness well," said the captain of an Atlantic liner. "I took a Liverpoolian to Canada last month, and the poor fellow did have a time—sick from the first day to the last. But he bore it well, and when we reached Father Point he said to me:

"Captain, I think I'll go straight back with you."

"Why?" said I. "I thought you were going to make an extensive tour?"

"No. I think I'll go back now," he said, gulping as a nasty swell lifted our bow. "I see by your rate card that you carry 'returned empties' at half fare."

Handicapped the Crow.

"You know, of course," said the man in the mackintosh, "that you can teach a crow to talk."

Silence gave negation to this proposition.

"It's so, anyhow," he persisted. "But if you slit his tongue straight down the middle, lengthwise, he can talk a good deal better. Why, I've seen that thing tested. A neighbor of mine, a college professor, had a crow that could speak several words. He had his tongue slit, and when the tongue got well the bird could say almost anything the professor wanted it to say."

"Did it perch upon the bust of Pallas, just above the—"

"Cut that out. I'm telling you something that actually took place."

"Did the bird talk itself to death?"

"Did it talk the professor to death?"

"Could it sing two parts?"

"Did it use words that had a double—"

"Gentlemen," interrupted the man in the mackintosh, "you make me intensely weary. The professor, it is true, gave the bird away. A bartender has it now."

"What was the trouble?" inquired the man with the green goggles.

"He couldn't make it talk grammatically. It split its infinitives."—Chicago Tribune.

The Thing to Do.

A noted golf champion said of a poor player: "Even his caddies make fun of him. The other day he had worse luck than usual. He continually got bunkered. It took him hours to work his way from one easy hole to another. In every bunker he asked his caddie for advice. 'Shall I try this stick or that stick, caddie?' And after he had stuck in one very sandy bunker for half an hour, trying nearly every stick in vain, he said as he fumbled helplessly in his bag:

"What shall I take now, caddie?"

"Well, if I were you, sir," the boy answered, "I'd take the 6:15 train home."

Well Posted.

Wayne MacVeagh, a brother of the secretary of the treasury, is always much sought in Washington as a dinner guest because he is famous as a conversationalist and wit. One evening when he was dining at the White House his dinner companion was the handsome but uninformed wife of a new senator. She looked at MacVeagh, who is small and wrinkled and no longer young, and decided that he and she could not have many topics of mutual interest. She resolved to resort to the commonplace.

"Do you dine at the White House often?" was her first question.

"Quite frequently," acknowledged MacVeagh.

"How often have you been here to dinner?" she continued.

"Well," said MacVeagh, with a twinkle in his eye, "I'll admit who was president when I first dined in the White House if you'll agree to tell me in what year he was inaugurated."

"Agreed," said the handsome woman.

"Franklin Pierce was the man," declared MacVeagh.

"Oh, go on!" she ridiculed. "There never was such a president."—Chicago Record-Herald.

W.B. NUFORM CORSETS

The best popular-priced Corset made.

Every figure can be becomingly corseted in one of the many attractive W. B. Nuform models. They present the figure in graceful lines and erect poise, effecting a decided improvement.

Made of service-giving fabrics—daintily finished and perfect in fit.

Price \$1.00 upwards to \$5.00 per pair.

Sold at all stores, everywhere.

WEINGARTEN BROS., Makers, 34th St. and Broadway, N. Y.

A FASHION CHAT ON FASHIONABLE WAIST DESIGNS

Furnished by Pictorial Review
222 West 39th Street, New York City

The correct waist for the tailored suit has come to be as important as the suit itself. A clever woman can make a smart up-to-date coat suit answer for two if she wisely plans and provides her waists to wear it. For instance, a blue suit, whether of broadcloth, serge or rough effect, will be extra smart if she has a tailored waist the same color; the waist may be of messaline, taffeta, moire or mohair, either of solid color or with a hair line stripe or dot. It can be worn with a stylish jabot and collar or stock and the outfit is just the thing for morning shopping or general street wear. She will also have a dressy waist to wear with the same suit; it also matches in color, mainly, but may have considerable contrast introduced in the way of lace yoke, collar and undersleeves, embroidery in another color or when the Persian effects are used the ground of the silk should match the suit, and bands of solid color relieve the mass of color. Again the figured silk may be entirely covered with blue chiffon, marquisette or voile nion. Such a waist is worth many times its cost when visiting or when the wearer meets her

friends for matinee or afternoon tea. A bit of colored embroidery on the wash shirt waist is very fashionable, and so are the frills and jabots with colored scallops and edges.

The tailored silk waist has a front or side closing this season more frequently than has been the case for some time, but the back closing is still preferred by many. It is usually becoming to the figure and allows any style or kind of elaboration for the front.

Satin striped marquisette is excellent for a dressy waist and is especially effective when it is printed in the Persian figures as illustrated in PICTORIAL REVIEW PATTERN No. 3664. As the marquisette is rich in figure and color effects it is worn over a white net guimpe which has a princess lace collar and undersleeves. The guimpe is not included in the pattern but the overblouse may be tacked in place over it after they are made. The body and sleeves are in one without a seam on the shoulder. This design is also adaptable to silk and cotton, Japanese and Indian motifs, squares, fancy or

plain silks, and all the veiling materials may be used over Paisley or Persian silks or the latter may be used alone. The blouse is also very effective in all-over Irish lace or made of wide cluny insertion put together. Pattern sizes are 32, 34, 36, 38 and 40 inches bust measure and size 36 requires 1 1/4 yards of 40-inch material.

The price of this pattern including cutting and construction guides is 10c. PICTORIAL REVIEW PATTERN No. 3647 is a charming model for a silk waist. Its style is excellent and it has a decidedly sporty appearance. Its sizes are 32, 34, 36, 38 and 40 inches bust measure and a medium size requires 3/4 yards of 27-inch material. Pattern, 15c.

The handsome blouse pictured in PICTORIAL REVIEW PATTERN No. 3649 shows a smart manipulation of the Persian silk material. The material is trimming in itself and the dainty frill at the neck adds to its beauty. Its sizes are 32, 34, 36, 38 and 40 inches bust measure and the price of pattern is 15c.

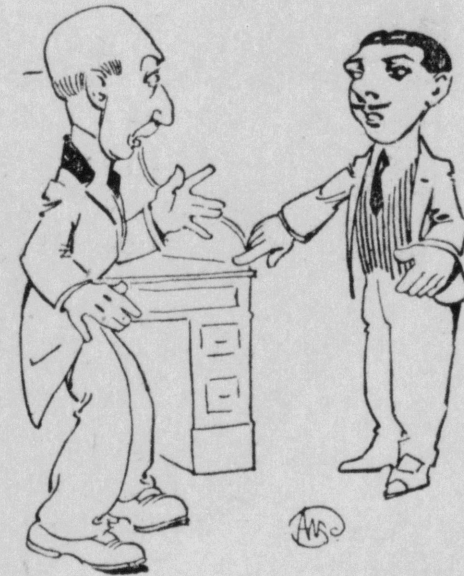

SURPRISED THE MINISTER.

The Nice Present Sent Him by One of His Parishioners.

As an office boy Master George, employed in a certain downtown place of business, is the dynamic essence of effervescent energy and the exemplification of cheerful obedience.

But there may be such a thing as too great promptitude. A few days ago George's employer emerged from his office and, seeing the office boy, requested him to take a package which he would find on his employer's desk and deliver it to the Rev. Dr. So-and-so of such and such street.

With a bound that would beat the starter's pistol easily George was into the office, out again with a large package under his arm and off to his destination. Now, Dr. So-and-so is

"LEFT THE PACKAGE ON YOUR DESK."

the business man's pastor, and the package, which was plainly addressed, contained a handsome volume intended as a birthday remembrance. Late in the day, after the office boy had gone home, the employer was nonplussed to find the designated package still reposing on the desk. For a moment he thought hard; then as cold beads of perspiration bedewed his brow he called in a clerk.

"John," he asked, with forced calmness, "did you get those supplies for my church party?"

"Long ago," said the clerk. "Left the package on your desk; bottle o' rye, bottle o' port, four decks o' cards an' a box o' cigars."—Pittsburg Gazette-Times.

Alarmed Him.

In a churchyard an old man deep in thought sat on a flat tombstone. It had been raining, and all the trees looked fresh and green. A traveler passing by made a remark on the weather. "Grand morning."

"Yes," said the old man. "Just the sort of weather to make things spring up," said the tramp. "Hush, hush!" said the old man. "I've got three wives buried here."

Putting It Mildly.

A traveler tells of a trip on a jaunting car in Ireland where he had as a fellow passenger an ugly looking man whom he was not sorry to leave behind at an inn.

"That was a queer looking fellow, Pat," I remarked to the wagging driver as we proceeded on our way.

"Faith, yer honor, and he's as queer as he looks. He's a villain. He's done fifteen years for laving his woiife without visible manes of support."

"Oh, get out, Pat! A man can't get fifteen years' penal servitude for 'laving his wife without visible means of support.'"

"Shure, and can't he, sir?" said Pat, with a twinkle in his roguish eyes. "He did, though. And, bedad, isn't it leaving yer woiife 'without visible manes of support' when ye throw her out of a window on the third floor?"

The Man Who Stayed.

For one woman who dominates her husband in China there are nine of the approved oriental stripe of humility. Nevertheless Chinese humorous literature abounds in references to henpecked husbands. Here is one of them:

Ten henpecked husbands resolved to form a society to resist the imposition of their wives. The ten wives heard of the plan and while the meeting for organization was in progress entered the room in a body. Nine of the rebellious husbands fled, but the tenth one retained his place, apparently unmoved by the unexpected visitation.

The ten wives, after smiling contemptuously on the one man who remained, went back to their homes, well content with the success of their raid.

The nine husbands thereupon returned to their meeting, resolved to make the heroic tenth man the president of the society.

When they entered the room, however, to inform him of the honor it was found that he was dead. He had died of fright.

Nothing Doing.

A farmer engaged an eminent doctor to attend his sick wife. The doctor had an eye out for the main chance and asked the agriculturist if he had the money to pay for an operation.

"Sure," says the farmer, "and I'll pay you \$100 if you cure her."

"I am not handling insurance as a side line," says the doctor, "and I do not take cases that way."

"Very well," says the farmer, "I'll pay you \$100 if you cure her or \$100 if you kill her." The doctor let it go at that.

The lady died, and the M. D. called for his fee. The farmer pulled out his roll and asked, "Did you kill her?"

"Certainly not," says the doctor. "And there is a heap of circumstantial evidence that you didn't cure her," says the farmer, carefully replacing the wad next to his femur, "therefore, according to our agreement, I don't owe you anything."

STERN ORDERS GIVEN BY DIAZ

Mexican Troops Instructed to Give No Quarter.

THE GALVESTON SIDE OF IT

Report From Gulf City Has It That No Arrests Are Being Made in Mexico, the Insurrectos Being Shot on Sight Under Instructions From the Central Government, and That the Slain Strew the Streets.

Galveston, Tex., Nov. 26.—With orders to take no prisoners and shoot any and all persons taking up arms against the government, the Mexican troops have literally strewn their marches with dead revolutionists and even innocent natives. In several houses in Puebla, Parral, San Antonio and other towns ten and fifteen bodies have been found where they fell when the troops shot into the buildings. On the roads leading from many places where the revolutionists were routed their dead are found where the soldiers pursued and shot them when fleeing. Officers of the army say there will be few if any arrests, even of the leaders, because when they are found they are certain to escape or fight and will be shot down. It is feared many soldiers have killed their personal enemies under the liberal orders issued them to shoot all revolutionists.

Openly charging Francisco I. Madero with organizing and directing the present disturbance, the Mexican government has offered a reward of \$25,000 for him dead or alive. In Mexican army circles the report is circulated that Diaz will add a personal reward of \$10,000 extra if Madero is taken alive. The report that he was wounded is not credited here.

REYES DENIES IT

Old General Says He Is Not Backing Present Insurrection.

City of Mexico, Dec. 26.—The statement which General Bernardo Reyes issued from Paris, France, in regard to the situation in this country and in which he affirms his loyalty to the administration of Diaz and belittles the present uprisings, has been widely published in Mexico. It was wired by the government to all parts of the republic and orders given to the authorities of the different districts that the people be made acquainted with the statement. General Reyes denied the report that he intends to return to Mexico to take a hand in the revolution, and expressed the opinion that President Diaz, whom he described as a great patriot, would succeed in restoring order and afterward adopt effective measures for allaying the present popular discontent in Mexico. It came as a telling blow to the ardor and hopes of the revolutionary leaders who have been diligently circulating the report that Reyes was back of the present movement and was even on his way to Mexico to assume command of the revolutionary forces. General Reyes's statement makes it probable that the army will remain loyal to the present administration, no matter what the turn of events may be. It is the hope in high official circles that the stand which General Reyes has taken will cause a speedy dissolution of the armed bands that are still roving in some parts of the country.

The report is current that President Diaz will restore Reyes to his former position as minister of war when he enters upon his new administration.

To Reimburse Aliens.

City of Mexico, Nov. 26.—Eduardo Chaix, consul of France in Puebla, has presented a claim against the government for \$3,000 damages done Julio Sibilot, a merchant of that city, during the recent revolutionary disturbance there. Other claims for damages to property of foreign residents will be presented, it is stated.

NEEDLESS FUMIGATION

Interurban Passengers Have Disagreeable Experience For Nothing.

Fort Wayne, Ind., Nov. 26.—Acting on information from Muncie to the effect that an incoming interurban car had diphtheria patients aboard who had broken quarantine, the Ft. Wayne health department held up the car when it reached this city. The twenty or more passengers and the crew were detained in the car until both car and occupants had been fumigated. Later it developed that the Muncie officers had the wrong car under suspicion, and that the suspected cases of diphtheria had passed through Fort Wayne going to Ohio.

Drove Him to Suicide.

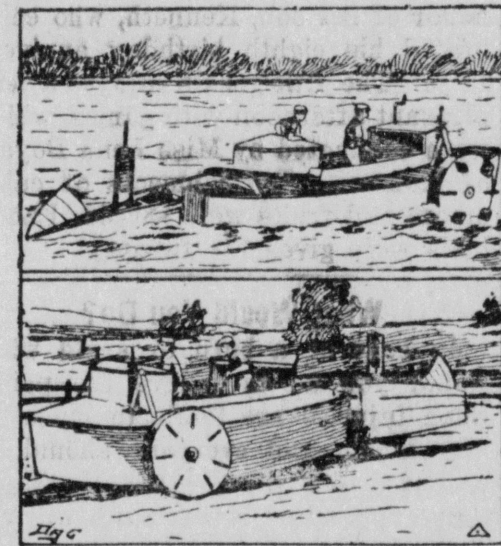

Cold Springs, N. Y., Nov. 26.—Robert K. Everett of the firm of R. K. Everett & Co., contractors, who are building the Catskill-New York aqueduct at this place, was found upon the estate adjoining his own residence with a bullet hole through his temple. It was a case of suicide. Mr. Everett had been worrying because of lawsuits against the firm, the result of an explosion in which ten men lost their lives while working in a tunnel on the construction work. Recently a \$10,000 verdict was given to the widow of one of the men killed.

AN AMPHIBIOUS AUTO.

Machine That Travels With Facility on Water and Land.

An amphibious automobile, designed by Rear Admiral J. A. Howell, U. S. N., retired, has been given a number of tests recently. The vehicle has been devised as a pleasure machine, and it is the idea of its originator to use it at beaches along the coast where a combination of motorcar and motorboat would be found very convenient. Admiral Howell has built several of the cars during the past two years, to which he has given the general name of "pleasure surfboats."

The latest model of the machine, which is called Amphib II., has just been finished. It is so constructed that

AMPHIBIOUS AUTOMOBILE, AFLOAT AND ASHORE.

it can be used in a heavy surf without danger or discomfort to its passengers, of which it can carry six. It is twenty feet long, six feet beam and has a tailpiece ten feet long. The road wheels are four feet in diameter and eight inches wide. The wheels, of which there are three, are cased with iron and have recesses for paddles. There is one screw propeller having three 18 by 22 inch blades on the port side. The engine used is a single cylinder, ten horsepower, two cycle gasoline motor, which gives the car a speed of twelve miles per hour on land and four miles per hour in water. There is planetary transmission between the engine and propelling mechanism on land and water. There are two water tight bulkheads, one forward and one aft. The after compartment holds the water and gasoline tanks, each of which has a capacity of twenty gallons. The tailpiece is pivoted to the hull, and an iron tiller, operated by wheel and chain in the cockpit, steers both on sea and land.—Popular Mechanics.

CRACKED WATER JACKET.

Method of Repair That Is Durable and Easily Applied.

Through neglect and carelessness many a gas engine water jacket is burst by being left with water in it on a very cold night. A crack of this sort gives a great deal of trouble and many times results in a loss of time in replacing with a new jacket or sending it to some factory to have it brazed.

If the crack is in such a place that no strain comes on it except the water, it may be repaired in the following manner and will hold water as well as a new jacket would.

Mix litharge with glycerin to a stiff paste and force it into the crack with a putty knife or some similar instrument. After filling the crack let it stand overnight, if possible, and on starting in the morning run the engine until it gets well warmed up before turning the water into the jacket. If this mixture is properly applied the job will be likely to last as long as the engine. One advantage it has over brazing is that it will give way again before breaking the cylinder if the carelessness is repeated, and in this case the mixture can be applied again in a short time and no serious delay will result. It is also valuable where the crank case has been patched and leaks oil. This paste can be used in putting together the case in place of the regular packing. When the case is taken apart the paste will cling to the metal and can be replaced as the regular packing.

A Spider That Lassoes Flies.

As we know, spiders have a number of ingenious ways of luring and catching their prey. A writer in Popular Science describes an American spider which haunts evergreen trees and snares its dinner by means of a kind of lasso.

The web of this spider is triangular in form. Two corners of the triangle are attached to twigs, but the other corner, which ends in a single thread, is held by the spider, perched on a neighboring twig. When a fly strikes the web the spider loosens his hold and the elastic threads instantly entangle the victim.

Weight of Paint on Street Cars.

A recent number of the Electric Railway Journal records some surprising figures on the weight of paint and varnish used on street cars. On a twelve bench open car it was found that the paint and varnish amounted to 180 pounds and on a fourteen bench car 221 pounds were used, while in the case of a double truck, closed car of the prepayment type the paint and varnish weighed nearly 600 pounds. This is an item which does not often enter into the calculation of weights when designing a car.

To Polish Ivory.

Smooth it with sandpaper, rub down defective spots, then rub off with soft flannel and washed chalk. The chalk can be moistened with water or oil. Finally complete the polish with a piece of soft linen on which a little oil has been dropped.

WORTH WEIGHT IN GOLD

Lady Learned About Cardui, The Woman's Tonic and is Now Enthusiastic in its Praise.

Mount Pleasant, Tenn.—"Cardui is all you claim for it, and more," writes Mrs. M. E. Rail, of this place.

"I was a great sufferer for 2 years and was very weak, but I learned about Cardui, and decided to try it. Now I am in perfect health.

"My daughter, when changing into womanhood, got in very bad health. I gave her Cardui and now she enjoys good health.

"Cardui is worth its weight in gold. I recommend it for young and old."

Being composed exclusively of harmless vegetable ingredients, with a mild and gentle medicinal action, Cardui is the best medicine for weak, sick girls and women.

It has no harsh, powerful, near-poisonous action, like some of the strong minerals and drugs, but helps nature to perform a cure in a natural easy way.

Try Cardui.

N. B.—Write to: Ladies' Advisory Dept., Chattanooga Medicine Co., Chattanooga, Tenn., for Special Instructions, and 64-page book, Home Treatment for Women, sent in plain wrapper, on request.

RARE CHANCE! Big Pay for Solicitors!

THE CINCINNATI WEEKLY ENQUIRER is offering Five Thousand Dollars in cash premiums to solicitors, in addition to a liberal commission that is more than ample to pay one's expenses, besides affording a living profit, while engaged in the work of soliciting subscriptions.

THE WEEKLY ENQUIRER is now a twenty-four page magazine-style paper, chuck full of reading most acceptable to any well-ordered home. Each issue contains a sermon by Pastor Russell, an essay by Dr. Madison C. Peters, a serial and short stories, natural history, general news and special record of political and national affairs that are of interest to all people, cut patterns for ladies and youths, and miscellaneous matter, all of high moral influence; also market reports from all commercial centers, and veterinary columns.

The editor's aim being to present the reader with an exceptionally good family journal of superior merit, free from all matters that antagonize morality, justice and truth.

To circulate such a paper, all well-meaning persons can benefit their community and add their mite in the uplifting of civic and political thought and action.

Any person, lady or gentleman, with leisure hours, desirous of doing a good turn for the community, at the same time earning fair payment, should apply at once for particulars by writing to THE ENQUIRER, Cincinnati, O.

B. & O. S.-W.

Home Seekers Rates to the West, Southwest, South and South-east at very low fare for the round trip. Dates of sale first and third Tuesdays of each month.

Both Speedy and Effective.

This indicates the action of Foley Kidney Pills as S. Parsons, Battle Creek, Mich., illustrates: "I have been afflicted with a severe case of kidney and bladder trouble for which I found no relief until I used Foley Kidney Pills. These cured me entirely of all my ailments. I was troubled with backaches and severe shooting pains with annoying urinary irregularities. The steady use of Foley Kidney Pills rid me entirely of all my former troubles. They have my highest recommendation." A. J. Pellens.

Children's Party.

Mrs. Birch Shuttis entertained twenty children at her home on west Fourth street, Friday afternoon in honor of her son, Kenneth, who celebrated his eighth birthday anniversary. The little guests enjoyed a very pleasant afternoon with games, which were conducted by Miss Lena Boyatt of Kokomo. Refreshments of cake, cream and fruits were served. Fancy balls were given for favors.

What Would You Do?

In case of a burn or scald what would you do to relieve the pain? Such injuries are liable to occur in any family and everyone should be prepared for them. Chamberlain's Salve applied on a soft cloth will relieve the pain almost instantly, and unless the injury is a very severe one, will cause the parts to heal without leaving a scar. For sale by Andrews-Schwenk Drug Co.

Six O'clock Dinner.

Mrs. Birch Shuttis entertained a number of her friends very pleasantly with a six o'clock dinner at her home on west Fourth street Friday evening. Among the out-of-town guests were Mrs. Ted Robertson and Mrs. L. B. Hamilton, of Brownstown, Mrs. Charles Scott, of Indianapolis, and Miss Lena Boyatt of Kokomo.

A Household Medicine

to be really valuable must show equally good results from each member of the family using it. Foley's Honey and Tar does just this. Whether for children or grown persons Foley's Honey and Tar is best and safest for all colds and coughs. A. J. Pellens.

S. O. Smith went to Columbus this morning to visit his wife who is in the hospital there, having undergone a serious operation several days ago. She is improving.

Sick Headache.

This distressing disease results from a disordered condition of the stomach, and can be cured by taking Chamberlain's Stomach and Liver Tablets. Get a free sample at Andrews-Schwenk Drug Co.'s drug store and try it.

J. H. Davis, was in Columbus Friday to spend a short time with his wife who is in the hospital there. He reports her some better today.

Good Results Always Follow

the use of Foley Kidney Pills. They are upbuilding, strengthening and soothing. Tonic in action, quick in results. A. J. Pellens.

Twenty-nine Days to Xmas

NOV. 26

Remember Shopping Rush Jes' 'Fore Christmas

Fifty Years Ago Today. Nov. 26.

Edwin Booth appeared in the role of Hamlet for the first time in New York.

President Elect Lincoln arrived at his home in Springfield, "to the delight of reporters and office seekers who have been lying in wait for him since Saturday," said a press dispatch.

Replying to critics, the New York Herald published its expenses for news for the second week after Lincoln's election: Special dispatches, \$1,533.51; share in the Associated Press dispatches, \$191.05; amount estimated for a year, \$50,000.

Twenty-five Years Ago Today.

Death of Marshal Serrano, who as regent long ruled the destinies of Spain.

NOVEMBER TERM CONVENES MONDAY

(Continued from First Page.)

be given her from her husband, Frank Borders, upon the grounds of abandonment, cruelty and neglect. She alleges that he failed to provide for her and the four children and that he neglected to care for them in the proper manner. They were married August 28, 1898, but separated in September, 1910. She asks for the custody of the children.

Hettie Steinberger has filed papers for damages from Ira W. Wells, because of a breach of a marriage contract. She assures that on September 29th at the request of the plaintiff, she agreed to marry him, and October 16th, was set as the day for performing the ceremony. She avers that she had the marriage license issued and had invited several guests to her father's home to witness the ceremony, and that they did come to his home at the specified hour, but that the defendant failed and refused to appear, which caused her great embarrassment and humiliation. She says that he still refuses to marry her and asked for \$1,000 damages.

In another divorce case, Maude E. Cordon is the plaintiff and Joseph T. Cordon is the defendant. She alleges cruel and inhuman treatment as cause for divorce, and states in her complaint that he would curse and abuse her and would often come home drunk and would strike at her with a knife, and one time she was cut on the arm and wrist. She asks for \$500 alimony.

In the suit of Charles A. McNelly against his wife Pearl McNelly, the plaintiff alleges that they were married in September, 1905, but have been separated since June 9th, 1910. The plaintiff says that the defendant was cold and indifferent toward him; that she continuously went away from home at night and refused to allow the defendant to accompany her, although he wished to do so; he further says that she would not cook meals for him and that he was frequently compelled to go to his work without breakfast when the defendant would lay in bed late, making it necessary for him to eat cold lunch on going to work.

Rosa M. Nantrup asks for a divorce from her husband, Virgil Nantrup upon the grounds of cruel treatment, in that he was cross to her, and in the presence of the plaintiff and her child would use vile and vulgar language especially if their friends were with them. She asks for alimony in the sum of \$1,000 and custody of the child.

Other divorce cases filed are:

Bert Clem vs. Florence Clem.
Ella Corthum vs. Wm. Corthum.

Edward Gaffney vs. Ella May Gaffney.

Martha Williams vs. John Williams.

Mary Trowbridge vs. Emmitt Trowbridge.

Volley Jefferson vs. Alma Jefferson.

FLYNN GETS BUSY

New York Chief of Detectives Seeks Solution of Trunk Mystery.

New York, Nov. 26.—Detectives who have been trying to unravel the mystery of the murder revealed by the discovery on Nov. 17 of a man's body in a trunk in the basement of the apartment house at 450 East Fifty-fourth street, have progressed so far that an order has been given by Deputy Commissioner Flynn for the printing of a large consignment of circulars containing descriptions of Albert C. Callier, the French artist, who is believed to have been the murdered man, and William Lewis, the Irish waiter whose connection with the murder the detectives have pretty definitely established. These circulars will be distributed abroad, particularly in France, as well as in this country and Canada.

MUTINEERS GIVE UP; AMNESTY PROMISED

Order Restored On Brazilian Warships Off Rio.

Rio Janeiro, Nov. 26.—The naval mutineers surrendered after congress had voted amnesty. The session of the chamber of deputies was awaited with anxiety, but its vote of amnesty and the surrender of the mutineers cleared the situation. The demands of the naval men were granted. The chamber of deputies first concurred with the senate in granting amnesty to the mutineers. Both houses then passed resolutions conceding the demands of the sailors. As soon as the action of congress became known the mutinous crews surrendered and the revolt was at an end. The city was soon quiet and resuming its normal activities.

The mutiny arose from dissatisfaction with conditions on board the war vessels. The mutineers demanded shorter hours, more pay, more men to aid in their work, and the immediate abolition of whipping as a means of punishment. The fact that the mutineers had control of the Minas Geraes and the Sao Paulo, the two large and powerful battleships of the most modern type, is believed to be the cause for the lenient treatment of the rebels. These two vessels are the most formidable in the Brazilian navy, and their loss would be a severe menace to the naval supremacy of Brazil in South American waters. This consideration was the dominant one actuating the government in granting complete amnesty to the mutineers. It was not expected, however, that they would go entirely unpunished. When the mutineers gave up the fight they sent the following telegram to President Fonseca: "We repent of the act which we did in our defiance. For the sake of order, justice and liberty, we will lay down our arms, trusting that amnesty will be granted to us. We will remain obedient to your excellency, in whom we place all trust."

The chamber passed the amnesty bill by a vote of 114 to 23. President Da Fonseca agreed that Deputy Carvalho, who acted as bearer of a flag of truce to the mutineers Thursday to obtain the terms on which they would surrender, should again visit the Sao Paulo and confer with the rebels.

Victim of Brutal Attack.

Goshen, Ind., Nov. 26.—Austin Gellett, a wealthy farmer of Benton township, living alone, was struck down at the door of his home by robbers and terribly beaten about the head. He crawled into the house after the robbers had fled and in the morning staggered to a neighbor's. Nothing was stolen. His injuries may prove fatal.

Mark Twain Once Said

"It is Spring Fever that causes the general unrest, lack of ambition and run-down condition which pervades the human system in the spring of the year."

The sudden change from frigid to torrid weather occurs within a few weeks, especially in our northern states.

No wonder pulmonary troubles—pneumonia, spring fever and all such ailments are almost universal.

If people in this vicinity only knew the value of Vinol, our delicious cod liver and iron tonic (without oil) at this season of the year, we would not be able to get enough to supply the demand.

Vinol tones up the digestive organs, purifies and enriches the blood, promotes healthful sleep and a normal appetite.

Old people, delicate children, run-down, overworked and tired women, those suffering from bronchitis, chronic coughs and colds, all derive great benefit from its use.

Try a bottle of Vinol with the understanding that your money will be returned if it does not help you. Andrews-Schwenk Drug Co., Seymour.

The damage done in the southeastern part of the county by floods is responsible for the movement that has been started by landowners west of Crothersville for the digging of a big ditch. It is figured that such a ditch would greatly enhance the value of property from the forks of the river to Langdon. William P. Rider, Henry Saylor, John M. Garriott and others are pushing the proposition.

Croup is most prevalent during the dry cold weather of the early winter months. Parents of young children should be prepared for it. All that is needed is a bottle of Chamberlain's Cough Remedy. Many mothers are never without it in their homes and it has never disappointed them. Sold by Andrews-Schwenk Drug Co.

Judging from the following clipping from the Crothersville Herald, the editor of that paper is a "dry."

Twelve quarts of wine arrived at this office from some unknown source. We have always managed to worry along on just plain water, with a little coffee on the side at meal times so the sender will kindly oblige us by removing the goods at an early date.

Mr. Otto Paul, Milwaukee, Wis., says Foley's Honey and Tar is still more than the best. He writes us, "All those that bought it think it is the best for coughs and colds they ever had and I think it is still more than the best. Our baby had a bad cold and it cured him in one day. Please accept thanks." A. J. Pellens.

The engine that was in the wreck at Butlerville a few days ago has been brought to this city and is in the yards here. It is badly wrecked and there is very little left of it except the boiler and wheels. The cab was completely demolished. It will be taken to the Washington shops for an overhauling and repairs.

The old, old story, told times without number, and repeated over and over again for the last 36 years, but it is always a welcome story to those in search of health—There is nothing in the world that cures coughs and colds as quickly as Chamberlain's Cough Remedy. Sold by Andrews-Schwenk Drug Co.

John Book, of Indianapolis, was here this morning returning home after a visit with relatives at Browns-town. While he was on his visit he took a coon hunt in Grassy Fork township, and was exhibiting a thirty-two pound coon which he had killed.

Scrub yourself daily, you cannot clean inside. This means clean stomach, bowels, blood, liver; clean, healthy tissue in every organ. Moral: Take Hollister's Rocky Mountain Tea, a thorough cleanser. Try it tonight. Andrews-Schwenk Drug Co.

The little trouble regarding the payment of city licenses for moving picture shows was settled temporarily, at least, Friday when the managers of Dreamland and of the Majestic paid their fees for another year.

Cleanliness is the first law of health, inside as well as outside. Let Hollister's Rocky Mountain Tea be your internal cleanser; then your organs will be pure and clean, your health good, your system right. Start tonight. Andrews-Schwenk Drug Co.

John Patrick and Frederick W. Miller, who were injured in an accident Wednesday afternoon when they were thrown from a buggy, are improving and are able to walk around.

Wanted immediately—Hundred ladies, young or old with pimples, blackheads, nasty complexion to take Hollister's Rocky Mountain Tea and become charming, beautiful and sweet. 35 cents. Andrews-Schwenk Drug Co.

Hollis Fultz, formerly the editor of the Crothersville Herald, is here from Frankfort, where he is employed as a linotype operator.

Nov. 1910,

Dear Friend:

Mama said this morning she was very thankful because there was a firstclass grocery in this town. She never has to send anything back she gets from there because they won't send out anything that is not best.

We get all of our nuts, and celery and cranberries and everything for Thanksgiving at this one place.

Your Friend,
JACOB.

P. S. That one place is

THE PICTURE SHOW {FILM NO. 14} 0000

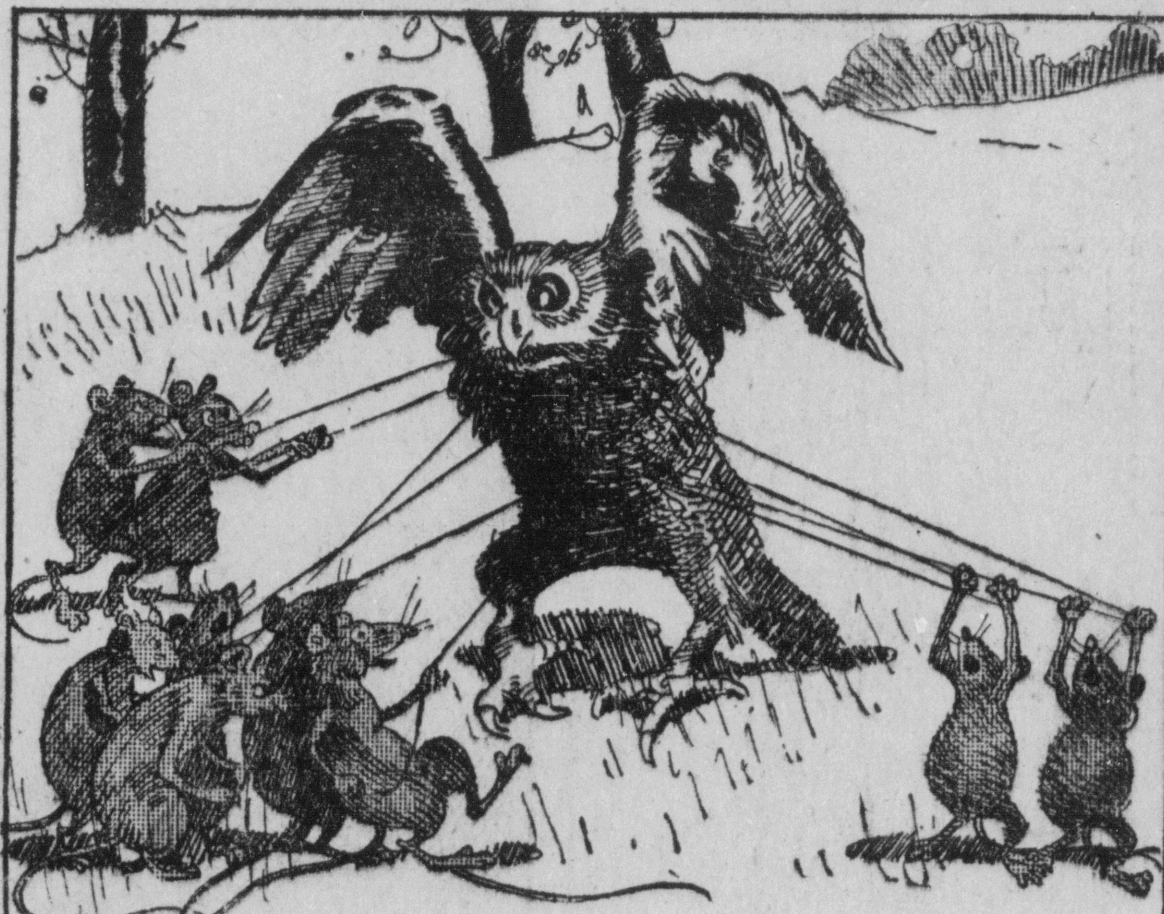

MR. PASSERBY TELLS PROF. DEFFEAR ABOUT THE FIRE AND
NOW BOTH ARE "ALL PUT OUT ABOUT IT"

ZOO GOSSIP - THE OWL HATES MICE--WHY?

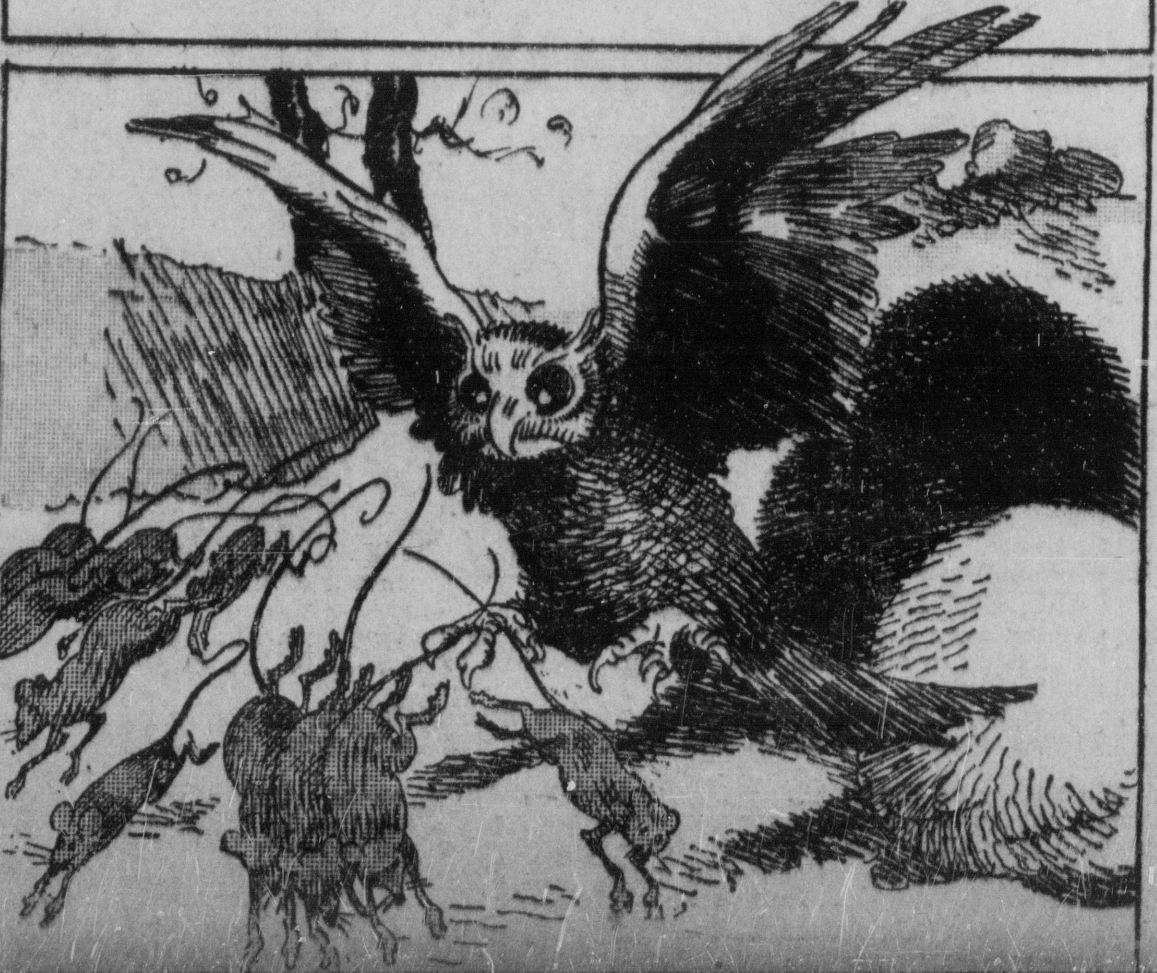

FOR CENTURIES THE OWL HAS BEEN REGARDED AS A BIRD OF ILL OMEN BY PERSONS IN GENERAL, BUT AMONG THE ANIMALS HE IS REGARDED MORE SO BY THE SPECIES OF RODENT KNOWN TODAY AS RATS AND MICE AS HE THEN ATE THEM IN GREAT NUMBERS.

AFTER YEARS OF THIS PRACTICE THE EXASPERATED RODENTS RESOLVED TO FORM THEMSELVES INTO ONE VAST ARMY AND CAPTURE THEIR WHOLESALE DESTROYER AND AFTER MANY INGENUOUS MANEUVERS THEY SUCCEEDED IN DOING SO.

UNITING THEIR EFFORTS THEY DRAGGED THE BOUND, BADLY FRIGHTENED OWL TO A DARK, DISMAL CAVE, AND RUDELY SHOVING HIM IN CLOSED THE DOOR TIGHTLY BY A LARGE STONE INTO THE OPENING.

PEEVISH POLLY

Polly and Little Sam
Entered in and ate her mama's jam

Just as naughty children can
Awful, awful Polly.

Polly then jumped down from the chair
Rubbed a lot in Sammy's hair

His head was one big smear.
Very naughty Polly.

Then 'twas Sammy ran home and cried,
"Oh, don't be mad," Polly then sighed

Mama then took Polly aside -
"I'll be good," moaned Polly.

ANNA BELLE'S BIRTHDAY PARTY

This is Anna Belle's birthday, children. She is now nine years old. Don't you know she's happy? She is giving a birthday party and her cousin Marjorie has planned quite a surprise for her. Instead of each bringing a present Marjorie had them all to put their money together and get Anna Belle a nice, what? Can you guess? The very prettiest pearl necklace you ever saw. Don't you know Anna Belle must be very proud, knowing that it represents the love of all her little friends? Wouldn't you?

In the upper picture you see them presenting the necklace to Anna Belle. "Oh, my throat just aches, I'm so happy!" gurgled Anna Belle as she placed it about her neck. Little girls always be kind and good to your friends as Anna Belle is and maybe some birthday when you're least expecting it they will remember you even more lovingly than Anna Belle did this time.

Anna Belle wants to thank each little friend for the many interesting letters they have written to her and hopes to hear from each one again. Write to me often and tell me of new things you'd have me do or wear. Address me care of this paper.

CATS BY LOUIS WAIN CAT-TALES TALES BY T.B. FAUCETT.

JUST CAT-KIDS—THAT'S ALL!

Uncle Jack and Aunt Pinky. Catkins were two good old cats. When any of the neighbors who had lots of little cats wanted to go shopping or fishing or anything, and wanted someone to look after the kittycats they always called on Uncle Jack and Aunt Pinky.

One day Mrs. Manycats asked them to mind her catties. "They're the best little cats in the world," she said. So Uncle Jack and Aunt Pinky came. For about five minutes all was quiet, when of a sudden bedlam broke loose in all its fury.

"Bang! Bang!" thumped Big Nigger on the piano. "Meow!" shrieked Billy, as he climbed up the face curtains. Little Nigger whisked the cover off the table and little Scat laughed so that he tumbled out of his crib. And so they continued until Mrs. Manycats returned. "Sure they've been the sweetest little cats," purred Aunt Pinky as they were leaving. "Never again!" shouted Uncle Jack as he raised his right paw aloft.

ANSWER TO LAST WEEK'S MUSIC PUZZLE—TIME, SHARPS, TIE, CHORD, STAFF, ACCENT, FLATS, BRAVE KEY, BAR.
